

Jayu Muduli

DOB- 22-Oct-05

Report for 2022-23 (first term)

Introduction

My name is Jayu Muduli. I am going to complete my 12th class in the month of October. I am volunteering as well as studying. I devote three-hours to Bliss group (5 to 6 years old) in which I make them do dance, painting, drawing, paper folding, puzzles, etc. I give two-hours to Perseverance group (9 to 10 years old) in which we make them do some important topics to improve their general knowledge. When I teach them, I gain more knowledge and my confidence also goes up. In 12th class, the subjects which I had taken were: History, English, Political Science, Home Science and Geography. I gave the exams for four subjects in April and now, I am preparing for one remaining paper – Geography, which I will attempt in October.

The following were my marks

in the subjects I have appeared for in Class 12

English	74
Home Science	76
History	67
Political Science	65

Geography

I study geography with Ananya Didi. She teaches us online. By doing online classes, I don't understand properly because it gets disconnected many times. I have finished my first book of Geography and I have done all my question answers. The first book of geography is a little

difficult for me. There are some chapters which I find boring. I have finished giving the test too for the first book. I have finished the second book with Pranjal Bhaiya, and I enjoy studying with Bhaiya because Bhaiya explains the text by giving many examples, which are very interesting and help me to understand. From the second book I have

done some chapters with Ananya Didi also, which were interesting to study. Didi teaches us by showing many pictures which are very beautiful and interesting, and to get a different kind of knowledge. By studying with Didi, I learnt how to see the map and study it. I have done lots of writing work with Didi. Now I am solving the previous years' question papers by myself and preparing for the examination. I am going to give my exam on 21st October.

Celebrations

For 15th August, I made the Perseverance group practise the play on Sri Aurobindo. I didn't participate in any drama myself as I helped the children to prepare. On *Raksha Bandhan*, I did a drama with my classmates. The name of the play was "Hansi and Hansu". The story was of two brothers and sisters, and I enjoyed practising this drama. We did it by ourselves without anybody's help. I was

very nervous while delivering my dialogues, but I tried my best to do it well. For *Ganesh Chaturthi*, I practised a song with my younger friends, and I helped and encouraged them to sing that song.

I enjoyed the *Ganesh Chaturthi* celebrations. I also went to do *visarajan* (immersion of the idol) with my friends.

Games

We have games every day. I have my games duty on Sunday with Perseverance and Progress groups. We play different games on different days. The games which we play are football, basketball, Frisbee, volleyball and on some days, we

play minor games. I like to play basketball and I enjoy shooting baskets the most. We do our exercises daily. I don't like to miss my games. I like to play games on rainy days also as it is very enjoyable to play in the rain. Once a week, on Mondays, I have my duty of roti making during games time.

Shramdan

I used to do my *Shramdan* in the afternoon at two o'clock. I used to enjoy cutting

vegetables and helping Nilambar bhaiya to cook food. I also used to help Mummy ji in serving tiffin. Nowadays, I am not able to do *Shramdan* because I have my online class with Ananya Didi in the morning at 6:00 am.

Assembly

We have assembly once a week on Saturday evening. I enjoy the assembly because I like to sing the songs which I like – like the songs which were taught to us when we were young. In assembly there are sometimes specific talks about our school.
