### Sansiddha Muduli

### 2021-22

### DOB- 19th June'18

Sansiddha comes to school every day with his mother. He never cries in the school. He is an active and candid boy. He talks to everyone frankly. He talks in village language but can understand didis when they talk in Hindi and can follow the instructions given in Hindi. He wears clean clothes every day and can brush his teeth independently. But he has a habit of beating which he needs to overcome. He eats very little quantity of food in the school and his food only contains Rice, Dal, and potatoes.

# Chanting

He needs encouragement to sit properly in the circle without disturbing anybody. Sometimes he does not chant but does so when asked by the didis to chant and sing.

Though his pronunciation is not very clear, he tries to make it clear and loud. He sings the action songs with the actions.

## **Drawing**

He likes to colour the drawing sheets with light shades. His paper is always neat and clean. But he is very fast in colouring. He finishes

his work quickly and rushes to his friends. Then he talks to them, plays with them and likes to do some mischiefs. When he is given free drawing work, he sits quietly for a few moments and returns the blank sheet.

### **Dance**

He loves free dance. He enjoys doing free movements. But when English rhymes are put, he copies the actions of didi.

### Games

He is confident in his gross motor skill. He likes outdoor activities. While doing exercises and games, he follows the instructions and does everything properly. Jumping, running and games are his favourite activities.

# Movies

He is always in a playful mood. So he is not able to sit silently and watch any rhymes on the TV. After one or two rhymes he becomes restless and thinks of excuses to come out of the hall to play with other group children.

Now we have to work on Sansiddha's concentration. He has to control himself and get rid of his beating habit. He will learn the languages easily as he is very active in the group.
