

Joy group

Report for 2024-25(first term)

In Joy Group, there are 17 children aged 3, 4, and 5 years. The children come to school every day and enjoy everything they are learning and all activities they do. They arrive in neat and clean clothes. At 8:30 AM, they brush their teeth and come to class. They always listen to their Didi. They have now learnt how to speak in Hindi, though not perfectly. They always try to do something new and sing songs very beautifully. They are also aware of toilet training and are able to concentrate in class.

The children are always ready for their next activity. They have learnt chants like "Asato ma Sad Gamaya," "Sri Vakratunda Mahakaya," and "Anand Mayee"; they have only learnt these three chants. They have also learnt songs such as "Stuti Aradhana," "Tan Ho Sundar," and some rhymes. In language development, they have learnt a little bit of Hindi and the names of objects they see. They have also learnt the names of fruits and vegetables and can recognise them properly. Sometimes, they are shown movies of Little Bheem, Little Krishna, and other topics related to their lessons.

Celebration

During festivals, they **performed** a dance on 5th July to the song "Sapno Re." They also sang a song on 15th August called "Nanhe Munne Senik Hum." For Janmashtami, they sang the song

"Gokul Mein Mach Gaya Shor," and for Raksha Bandhan, they tied a rakhi. They enjoy dancing very much.
