

Lita Gouda

DOB-27-Mar-18

Report for 2022-23 (First Term)

Lita is a cute and silent child. Every day she comes to school happily. She never cries in the school. She talks very rarely in the group and talks only to her friends when she is outside or goes for a walk. She remains so silent in the group that she never expresses her feelings with didis. She says nothing to didi, whether she feels hungry, or needs to use the washroom or anything else. When everybody goes to the toilet and asks her to come along, she sits silently in the group without responding to anything. She is very possessive towards her own things. When she comes in dirty clothes and is given clean clothes to change into, she does not accept them. She wants to live in her own world without interference from others.

Chanting

She sits in the circle with closed eyes in a meditative posture but without uttering a word of the mantras. When she is addressed again and again, she speaks a few words. Her participation in singing is also very limited but she does the actions nicely with everybody.

Drawing

She has a good sense of colour. Her fine motor skills are well developed. She colours

beautifully. She loves to use bright colours such as orange, red and blue. She always completes her work with patience. But

when she is given freehand drawing, she sits quietly.

Dance

English music and songs are completely new for her and it is very difficult for her to express and do any movements with that music. Sometimes she does some actions after observing didis' dance. But when she is given any free dance with soothing music she moves with the music.

Games

She likes to participate in games and exercises. She does everything i.e. running, jumping and joint exercises properly. She enjoys the fun games also.

Maths

Lita is an intelligent girl. She pays attention in the class. She has learnt counting till 20. She enjoys a lot counting with objects and playing with the objects. She likes all the math activities done in the maths class.

Movies

She likes to watch movies but after watching two or three rhymes, she finds difficulty in concentrating. And if she is again

asked to sit, she lies down. Lita is taking time to recognise and understand the new languages like Hindi and English. She has learnt Hindi language a little bit and she tries to talk in Hindi to everybody. But soon she will be acquainted with it and will learn easily.
