

Labo muduli

DOB- 10 October 13

Report for 2023-24 (2nd term)

Annual Attendance 345 out of 366 days

Mathematics- Labo, is working through the third-grade curriculum, is currently tackling measurement concepts such as length and capacity. Despite finding word problems challenging, he exhibits a competitive spirit and strives to outperform his peers. Labo has shown improvement in his handwriting and is currently learning about fractions. While he may experience frustration when

encountering errors, he occasionally adopts a serious demeanour in class and focuses on his studies without engaging in conversation.

Projects- Labo is a very curious boy who was very excited to learn about the bicycle topic because he enjoys riding bicycles. In this topic, he learned about many types of bicycle brands and read their details in books. He needs to concentrate more on his writing skills, which all teachers are encouraging him to improve. He also learned the parts of the bicycle and tried to remember all of them. In class, he answered most of the questions about bicycles correctly. He also made a model of a bicycle with cardboard with the help of his friends and participated in the story group, writing a beautiful story about bicycles.

Time Topic: Labo's engagement with the Time project was marked by his inquisitive nature and enthusiasm for learning. Prior to delving into the topic, he displayed excitement and eagerness to explore the concepts of time and clocks.

Throughout the project, Labo demonstrated a proactive approach by asking numerous questions to clarify his doubts and deepen his understanding of the subject matter. Despite encountering challenges, he remained engaged and sought to participate

actively in group discussions.

One of the key takeaways for Labo from the Time project was the importance of punctuality and effective time management. Through his involvement in activities such as shadow marking and creating clock models, he gained practical insights into time measurement and its significance in daily life.

Labo's dedication to observing and analysing the changes in shadows at different times of the day reflected his commitment to experimenting and learning. His active participation in these activities contributed to his holistic understanding of the concepts explored in the project.

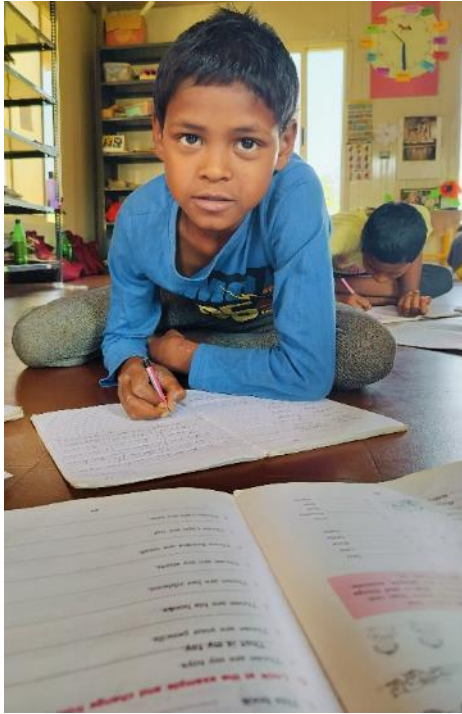

Flower Topic: Labo's curiosity continued to drive his exploration of the Flower topic, as he posed numerous questions and sought answers through reading books and engaging in discussions. Despite encountering difficulties in understanding certain concepts, such as the functions of flowers, he persevered in his efforts to comprehend the material.

Labo's level of concentration varied depending on his level of interest in the topic at hand. While he tended to get lost in thought if he lacked interest, he displayed focused attention and dedication when engaged in activities that captured his interest, such as making drawings of flowers.

His enthusiasm for hands-on activities was evident in his enjoyment of making juice from hibiscus flowers, an experience that was new and exciting for him. Labo's willingness to try new activities and his enjoyment of the project underscored his positive attitude towards learning and exploration.

Overall, Labo's participation in both the Time and Flower projects showcased his inquisitive nature, proactive approach to learning, and willingness to engage in hands-on activities. Despite facing challenges, he demonstrated resilience and a commitment to deepening his understanding of the topics explored.

English- Labo is an enthusiastic participant in English class, displaying a love for learning. However, he can become distracted when friends disrupt his reading. While his reading skills have shown slight improvement, he could benefit from additional practice. Labo excels in writing, boasting beautiful handwriting. He has successfully completed the first book of grammar, focusing on various topics including nouns, verbs, pronouns, adjectives, articles, and compositions. Additionally, Labo participated in an English drama titled "In Search of Riches" on the Mother's Birthday, diligently learning his lines over two days, and also memorized the poem "Surrender."

Hindi- Labo has demonstrated commendable progress in his studies. He successfully completed the "Abhyas Pustika" and the 2nd "Gyan Sarovar" books, finding them particularly manageable due to the inclusion of short stories. Currently engaged with the 3rd "Gunjan" book, Labo exhibits both speed and precision in his work, ensuring neatness and timeliness. He consistently presents his notebook for review, reflecting his commitment to completing tasks promptly. Notably, he actively seeks assistance from teachers when faced with challenges, displaying a proactive approach to learning. Labo engages in grammar sessions twice a week, demonstrating participation by attempting to answer class queries, despite occasional errors. His dedication to self-improvement is evident in his continued self-reading and group reading activities, resulting in significant enhancements in his reading comprehension and dictation skills. Labo's recent acquisition of a Christmas song, "Dekho Aayi Hai Raat Christmas Ki," and his creation of a heartfelt story for the Mother's birthday underscore his creative abilities and commitment to learning.

Odia- Labo usually sits properly but gets distracted when his friends are around. He has an interest in Odia and has shown improvement in speaking, although he may make some mistakes in words. He enjoys storytelling, singing, and dancing. While his alphabets are clear and pronunciation is good, he occasionally makes mistakes in some alphabets. He can answer questions properly and read easy words. He also enjoys writing on the blackboard.

Arts and crafts- During the past few months, Labo has been diligently working in silence, consistently producing neatly coloured artworks. While he faced challenges with oil pastels, he displayed a keen interest and eagerness to learn. Despite encountering difficulties with shading, Labo actively strives to enhance his skills in this area. Additionally, he is noted for his amiable and friendly nature, fostering a positive atmosphere within the class.

Shramdan- Please refer to the introduction of the group report.

Games- Labo is a keen young boy who has a strong interest in sports, and he shows great enthusiasm while participating in different activities. He is punctual and always attends exercises on time. He is a strong runner, but he needs to work on his flexibility during yoga exercises. He exhibits excellent strength during games, but he needs to learn to pass the ball to others and work as a team player. Labo has great potential, but he needs to focus more on following instructions and improving his coordination during games. He enjoyed participating in the skating corner during sports day, and it was an excellent opportunity for him to showcase his skating skills twice.

Puzzles- Labo finds joy in participating in puzzles class and completes puzzles with precision. He engages in puzzles games once a month and typically completes puzzles ranging from 60 to 80 pieces. Currently, he is working towards completing 100-piece puzzles and has shown improvement in his puzzle-solving abilities.

Celebrations- Please refer to the group report.
