

# CHAITI DEVLIA

*Date of Birth: 8<sup>th</sup> Mar 2012*

**JOY**

Chaiti comes regularly to school. When she feels shy, she shows her tongue and plays with her fingers. She does tribal dance beautifully. She sits like Shiva for a few minutes during chanting. After that she starts playing with her fingers. When didi tells her to sit properly, she rubs her eyes and nose.

She nicely does the actions on songs but doesn't sing well. She remembers a few words of songs. Chaiti's favorite Hindi rhymes is *titiliranitiliranikahaudchali*.

When we tell her a story, she listens very quietly. She herself tells stories with pictures, nicely in Hindi.

She likes animals stories. Her favorite animal is monkey.

In math time, she can count forward up to 20. But in backward counting and four operations, she is not clear. Chaiti can do mental addition well. She has learnt shapes and identifies them. She knows the words far and near, tall short, big and small. She has learnt about the week and is able to say the names of days. She enjoys all school functions such as Ganesh puja, school birthday, etc.

During puzzles time, she works very conscientiously. She can find what comes next in puzzles and assemble small pieces. She is a bright girl but is sometimes stubborn.

She likes to do all types of skill activities with concentration.

While taking part in different physical activities, she tries and enjoys playing all games- indoors and outdoors.

Chaiti is a very shy girl and with proper guidance, she will grow like a bright star.
