

# Madhav Krisani

DOB- 3 January 2011

Report for 2023-24 (First Term)

Attendance- 183 out of 183 days

## Introduction

My name is Madhav Krisani, and I'm 12 years old. I have a deep appreciation for my school, Auro-Mira Vidya Mandir. I value discipline and aim to keep my school clean. I take pride in my school and find joy in all the activities it offers.

## Yogasan

During yogasan class, I practice various asanas such as Halasana, Sirsasana, Padmasana, Bajrasana, Tree pose, and headstand. I particularly enjoy handstands. While I can perform some asanas like handstand, Padmasana, Tree pose, and headstand, there are others I'm working on. I appreciate the health

benefits of yogasan and consistently attend class on time, striving to listen to my teacher.

## Shramdan

I actively participate in shramdan, taking on various tasks, including toilet cleaning, kitchen work, school cleaning, girls'

hostel cleaning, and gardening. My favourite shramdan task is gardening, where I engage in digging. However, I find toilet cleaning less enjoyable. I strive to complete my tasks diligently.

## Science

I have a genuine interest in our science class, and I am currently studying the 8th-grade curriculum. To date, I have successfully completed 16 chapters from the science textbook. Some of the notable chapters we have covered include "Light and Sound," "Reflection and Refraction of Light," "Electric Current," and "Some Natural Phenomena."

What particularly stands out in our science class are the hands-on experiments. We have explored concepts related to friction, sound, and light through practical experiments, making our learning experience more engaging. For example, we conducted experiments to understand the different sounds

produced by prongs with varying frequencies, and we delved into the laws of reflection, learning about mirrors and their practical applications.

The chapter on friction presented an interesting experiment illustrating the difference between rolling friction and sliding friction. As we progress through the curriculum, we are now studying "Refraction and Dispersion of Light." This chapter introduces the concept of drawing ray diagrams for convex lenses and understanding the characteristics of images formed by such lenses. While I occasionally find the diagrams challenging to create, I truly enjoy this aspect of the subject.

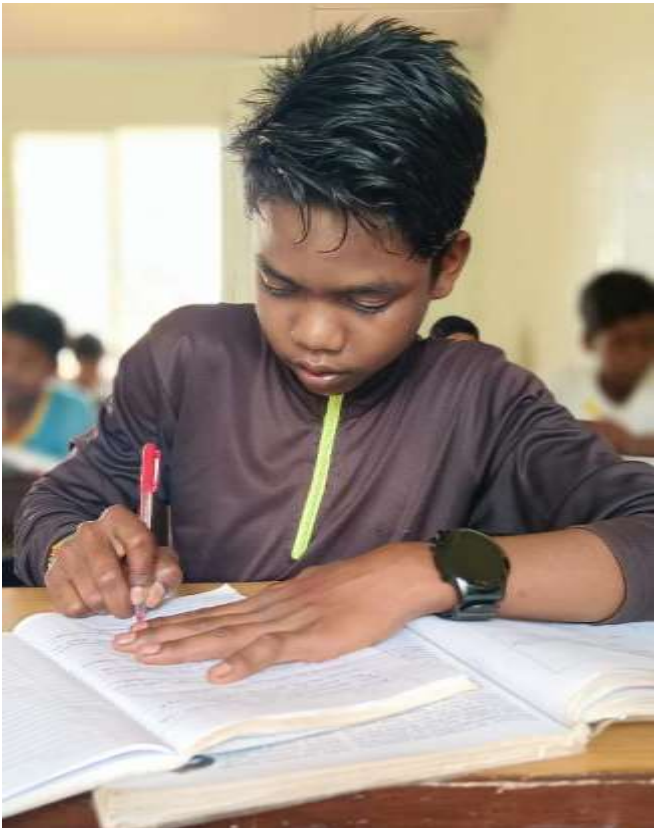

I have a special affinity for working with electric devices and gadgets, which makes the chapter on "Electric Current" particularly intriguing to me. I consistently complete my homework assignments and ensure they are ready for submission.

Though I am typically quite focused during class, there are moments when I get distracted by my friends, and occasionally, I may even doze off, especially on Wednesdays when I arrive home from school.

In summary, my passion for science drives me to actively participate and excel in this subject. I am genuinely interested in the hands-on learning experiences, which have made complex concepts more accessible. While there is always room for improvement, I am committed to further enriching my knowledge and involvement in the subject of science. If you have any additional questions or require further information, please feel free to ask.

## Maths

I enjoy math, and I'm currently studying the 6th-grade math book. I'm working on algebraic expressions, and I diligently complete my math homework every day. I'm a regular attendee in the class, and I'm not afraid to approach my teachers or older students (didi and bhaiyas) when I have difficulties or doubts. My favourite chapter is integers, but there are times when I feel lazy and bored, leading to brief moments of dozing off. However, I concentrate well when didi explains concepts on the board. I try to complete my exercises quickly, but my speed and accuracy need improvement. In my latest integer test, I scored 9 marks.

## Hindi

I enjoy attending Hindi classes and have a passion for reading. I have recently completed the 5<sup>th</sup>-grade book "Gunjan." During my free reading time, I

sometimes come across difficult sentences that I can't fully understand. In such cases, I turn to didi for clarification. Occasionally, I find it challenging to focus in class and may not always listen attentively.

I have been working on improving my handwriting, and on Chacha Ji's birthday, I even shared a joke with the class. I enjoy humour and like to tell jokes.

In my grammar studies, I am currently in the 5<sup>th</sup>-grade portion of the "Gunjan" book. I took a test and scored 39 out of 90, which is less than I hoped for. I am preparing for a retest to improve my score. My handwriting is generally good. However, I struggle

with spelling, and sometimes I feel reluctant to participate in Hindi class because it can become boring, and I occasionally feel lazy when working on question and answer exercises.

In my free reading, I have a fondness for "Panchatantra" stories and enjoy free reading immensely.

## English

In my English class, I focus on grammar and have completed the Communication Book for the 4<sup>th</sup> class. I also practise free reading, and my favourite book to read is Panchatantra. I put a lot of effort into finishing the 4<sup>th</sup> class Communication Book. I'm punctual for class. In group reading, I've completed two Harry Potter books and am now reading R.K. Narayan's "Swami and His Friends."

For the school's birthday celebration, I performed in a play as a woodcutter. I enjoyed this character, which had fewer lines that I could speak fluently. I've learned songs like "*Piya Tose Laga Jo Ye Man*," "Give Me Freedom," and "What a Wonderful World." I've also learned poems like "Who," "Tree," "Surrender," "God," "Krishna," and "Invitation."

On Independence Day, I participated in a play as a zamindar, and I enjoyed this character too. However, I admit that I don't often speak in English, which affects my fluency. I don't particularly enjoy dictation because my spelling is not very strong. I understand some aspects of essay, notice, and message writing, but I'm not entirely clear on them. I typically require the teacher's assistance for grammar exercises.

Over the past few months, I've issued and read various books, including "Alexander the Great," "The Story of Castles" by Zac Pawan, "Who Was Pablo Picasso," "The Tiger for Malgudi," and many more. I recognize the need to improve my reading skills to excel in dictation.

## Social science

I like to do social studies classes, currently I am in the 16th chapter India after Independence in history and 8th chapter in geography Agricultural

development case studies from India and USA. I find the chapters difficult and I don't pay attention. Many time I feel drowsy.

## Celebrations

I actively participate in various celebrations, including dramas, dances, singing, poem recitations, and plays. For example, I played the role of a woodcutter in a drama about three trees on July 5<sup>th</sup>, where I performed nicely but was a bit nervous. On August 15<sup>th</sup>, I took on the role of a zamindar in a play about the freedom struggle, and I remembered my lines well. I enjoy and actively participate in all school celebrations.

## Odia

I have a strong liking for Odia class. Currently, I'm studying the 2<sup>nd</sup> book in Odia. I enjoy reading Odia, and during Odia class, we engage in group reading activities. I take pride in my neat handwriting, and I'm working on improving it. Copywriting stories is something I particularly enjoy.

## Music

In music class, I learn to play the flute. I'm learning the notes S R G M P D N S, as well as note combinations like SRG, RGM, GMP, MPD, DNS. I find playing the flute quite enjoyable, and I practice various ragas.

## Games

I actively participate in games like football, volleyball, basketball, and exercises. During exercises, I engage in running and joint exercises. Football is my favourite sport, and I enjoy running. I do my best not to cheat, even though there may be moments when I'm tired. I aim to improve in basketball and volleyball. Occasionally, I might feel lazy about playing games, but I make a conscious effort to participate. I'm punctual for my games and listen to my teacher.

## Computer

In computer class, I'm learning typing. I'm currently practicing typing with the keys R and U, and I've already cleared the keys A, S, D, F, J, K, L, ; , E, and I. Occasionally, I also get to engage in painting. I have an affinity for painting, and I appreciate typing as

well. I'm working on coming to class more consistently and always make an effort to listen to my bhaiya.

## Art

I find joy in art class, especially drawing. Currently, I'm learning stencil cutting, though I find it a bit challenging. I also engage in paper folding and have learned to make a paper bag and envelope. Additionally, I get to practice painting, something I thoroughly enjoy. I'm punctual in attending art class and pay close attention to my teacher.

## Dance

In my dance class, I'm currently learning a Punjabi folk dance. I find it enjoyable, and the steps are relatively easy for me to grasp. During the recent Ganesh Chaturthi festival, I performed a dance and managed to complete it well. While there might be

moments when I don't feel like dancing, I particularly like Punjabi folk dance because I appreciate Punjabi songs. I make an effort to attend class on time and usually listen to didi, although there might be instances when my focus wavers.

## **Meditation**

I have a fondness for meditation, particularly singing songs and learning new ones. I can sing many songs confidently. I find the experience peaceful and come to meditation class on time without causing disturbances.
