

Madhumay Sahu

Date of Birth- 24th November 2003

Report for 2022-23 (Second Term)

My name is Madhumay Sahu. I am a student of Auro-Mira Vidya Mandir. I completed my class 12th in science stream in November 2022, though the results were declared in February.

I scored 54% in Chemistry and 52% in Mathematics. The other papers I had appeared for earlier.

Just after finishing my paper I went to Sri Aurobindo Ashram-Delhi Branch to study Physics with Prakash bhaiya, who has been my teacher for two years now. He prepared me for my entrance exams and also for my higher education. Along with that I helped in the kitchen and in the herbal centre. In the kitchen I used to cut vegetables and sometimes used to help in the bakery to bake cakes and breads. In herbal centre I used to dry different kinds of herbs, flowers, leaves, amla (Indian Gooseberry), etc. I learnt making Herbal medicines using those materials. I used to pack them and seal them. During those six months I was regular for the shramdaan and workshop. Now I have got admission in Creative Techno College, Angul, Odisha. There I will be doing B.Sc (H) in Computer Science. I would be shifting to a residential college. Since I have spent the last seven years in the hostel in Kechla, I think I will manage and be more disciplined there and will focus more on my studies.

Sports

I would always play football or volleyball. But now I have started playing basketball as well, and have been enjoying it.

I have never been healthy, even as a child and have been falling sick

all the time. That is the reason that I have completed my 12th at the age of 19 years and also the reason why I did not get good marks in my exams. I am now much healthier than ever before and hope to do well in my studies, sports as well as co-curricular activities.
