## Report for 2024-25(first term)

### HINDI

I enjoy working in the workbook. We focus on workbook exercises, grammar, group reading, self-reading, and dictation. I am currently finishing my 4<sup>th</sup> book of Gunjan and am on the last chapter. The workbook is easy for me because the questions are straightforward.

In grammar, I have completed my 3<sup>rd</sup> book and am now working on the 4<sup>th</sup>, which contains new and slightly challenging chapters. I am dedicated to my studies and have 12 chapters left to finish.

During group reading, I read the "Badhte Kadam" book with my friends, from which we've enjoyed many stories. For self-reading, I choose books like "Dhruva," "Tansen," "Akbar," and

"Vasavadatta." I believe I am good at reading.

In dictation, we get words, and I write them in my notebook. Sometimes, I also write poems. For Raksha Bandhan, my friends and I wrote poems, and I composed a beautiful one that my friends presented on stage.

### MATHS

I like maths and am currently revising my fifth book. The multiplication chapter is easy for me, and I find all chapters manageable once I

understand them completely. If I don't understand a question, I ask for my help.

My calculations are good, but I prefer to write down larger numbers to avoid mistakes. I solve problems mentally, though I do it a bit slowly.

### SCIENCE

Science is my favourite subject. I conduct experiments, take notes, take tests, and create diagrams. I've performed many experiments, such as checking acids and bases using litmus and turmeric paper and observing transpiration in plants.

A few weeks ago, my friends and I held a science exhibition. Both senior and junior students attended. I presented a simple circuit experiment, and my friends and I spent about a week preparing charts and models.

### SOCIAL SCIENCE

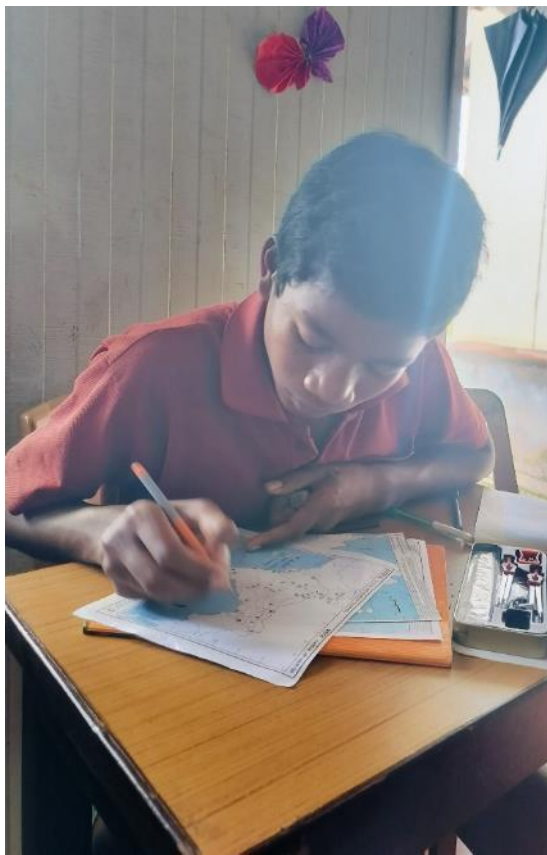

I have completed the chapter on the political division of India and have taken its test. In the 7<sup>th</sup> book of civics, I have finished the first chapter. The chapter on

major landforms of Earth was challenging for me.

We take chapter-wise tests, and I usually score well. During the celebrations, we missed some classes for rehearsing our plays and songs. When I don't understand questions, I ask for clarification. While my understanding is good, I struggle to write detailed answers.

## ENGLISH

I enjoy English class because I love to read. I work on the workbook, grammar, group reading, self-reading, and spelling exercises. I am studying the 6<sup>th</sup> book of Engaging English and have completed 8 chapters. I found the chapter "Owls in the Family" quite challenging.

Although my handwriting isn't great, I am working to improve it. In grammar, I have started the 4<sup>th</sup> book. I am learning about subjects, predicates, adjectives, and more.

During group reading, I read with my friends. So far, I've read "Matilda," "The Blue Umbrella," and "Harry Potter." For self-reading, I enjoy "Amar Chitra Katha," Enid Blyton books, and folk tales. My favourite book was "The Time Machine" by H.G. Wells.

I also participated in a play about Sri Jagannath, where I played the role of Vishwvasu. I performed well, and everyone liked it, even

though I had a fractured leg. On Sundays, I watch movies, including "Matilda," "BFG," "Yang Jian," "The Little Prince," and "Harry Potter," with "Harry Potter" being my favourite.

## DANCE

I have dance class on Wednesdays. I enjoy dancing, although I struggle with stretching. My friends and I have performed several dances for festivals. On August 15<sup>th</sup>, I danced to "India Wale," and I did Bhangra for Rath Yatra. I tried my best, even though I found some parts challenging. I find it difficult to perform Bharatanatyam since it requires sitting in a half position for long periods.

## ART

I like art class because I get to draw, do paper folding, and learn how to shade

with a pencil. Origami is my favourite! So far, I have made hanging balls, paper fruits (like apples, pineapples, and oranges), airplanes, frogs, and rabbit boxes. I learn the steps quickly, but I sometimes forget them soon after.

In drawing, I create nature scenes and still life by observing objects in front of me, although I don't think my drawings are very good. I also practice shading, but I still need improvement in that area.

## COMPUTER

In computer class, I work with Typing Master, painting, saving projects, and calculating marks. Sometimes, I also use my textbook. I am currently on the 4<sup>th</sup> book of WI-FI. In Typing Master, I'm on the 6<sup>th</sup> course, focusing on new key shifts and text drills. My typing speed and accuracy are good.

In painting, I enjoy creating whatever I like, especially 3D paintings. I have learnt how to save our paintings and reports and started with the basics of

computer usage.

## YOGA REPORT

My yoga class is from 6:00 to 6:30 AM, and I attend regularly. However, I find it challenging to stretch and bend. I practise asanas like Kukkutasana, Savasana, and Mayurasana. In August, Partha bhaiya taught us about yogic chakras and their names. He was an excellent yoga teacher and has received international yoga awards.

## SHRAMDAAN

defending in football. I start with exercises for warm-up. While I don't play volleyball, I practise. In basketball, I like shooting and defending as well.

During Shramdaan, I participate in cleaning the kitchen, girls' hostel, boys' hostel, toilets, school, and gardening. I enjoy cleaning the school and gardening the most. In the kitchen, we prepare breakfast, cut vegetables, and clean utensils, although I don't particularly like kitchen work.

For toilet cleaning, I clean the toilets, basins, and dustbins. In hostel cleaning, I remove plastic waste and collect leaves to make manure. In gardening, I pull out weeds and take it to the cowshed for the cows.

## SPORTS

In sports, I enjoy playing basketball, volleyball, and football. Football is my favourite because it involves running, which is good for health. I excel at

## SATSANG

In Satsang, I sing songs, play Antakshari, and learn new songs. I begin my Satsang at 6:15 PM and finish at 7:00 PM. I start with chanting and then sing bhajans. On Thursdays, I learn havan mantras and Gita chants.

## CELEBRATIONS

During the school's birthday, I celebrated Tara didi's birthday and performed a Bhangra dance. Although I struggled with some steps, I remembered most of them. For Rath Yatra, I had a lot of fun pulling the ratha and dancing, especially since this ratha was larger than last year's. I also took photographs of the idols, which were made of wood.

On Independence Day, my friends performed the "India Wale" dance, but I couldn't participate because I had a fever. For Janmashtami, I sang the song taught by Shantanu da. I sang it well, although I hadn't practised the much.

During Ganesh Chaturthi, I danced to "Namaste Ganapataye," worshipped Lord Ganesha, and enjoyed the prasad. On Raksha Bandhan, my friends presented poems on stage, and we tied Rakhi to each other while enjoying ladoos.
