Date of Birth- 21st October 2004

April 2018 - March 2019

# MANSI GOUDA

*Hindi-*

Since I have started studying Hindi, I have learnt a lot and remember a lot. I enjoy learning Hindi with my classmates. We have learnt a lot like-

Syntax

Correction of incorrect sentences

Punctuation

Decoration

Idiom and proverbs

Letter writing

Essay writing

Oral expression

Prefix and suffix

Joining of words

compound

# MANSI GOUDA

It has been a lot of fun. I enjoyed writing essays. We wrote about the villages of India, their way of living and day to day life. First we read from the book and then we give test of about 10 marks and I got 8 out of 10.

We had to write 3 or 4 pages in an hour and I was able to do it, and I enjoyed a lot while writing. We wrote on many other topics and all were nice and easy for me to write. I had a hard time remembering the idioms in Hindi, but somehow I was able to remember all the idioms.

We have finished 10<sup>th</sup> book 1 and book 2 and we are revising for test. We have given test in 9 chapters and in all of them, I did my best and scored decently well.

On Mondays we go to read in the library, I enjoy reading books by Premchand. I have to improve my writing skills. Now we have to start letter writing. I am enjoying Hindi class. We learnt a song for Christmas, '*neki ki rahon par tu chal...*', I liked it a lot.

# MANSI GOUDA

## *Math-*

Math is a bit difficult subject for me, but still I try to do it. With a lot of difficulty and hard work, I finished the 9<sup>th</sup> class book in 5 month.

I got a lot of scolding but never got upset and somehow I covered all the chapters. From January, we have started 10<sup>th</sup> book of math and we have covered 6 chapters from 1st book and 3 chapters from 2<sup>nd</sup> book.

We also got tests in these chapter. All the tests went well, & I got good marks. Whenever I feel bored, my interest goes from math and I just waste my time, which is not good. I have to be more serious in math.

I have problem remembering formulas. My reading phase has decreased. I have to become more sincere from the point of my exam.

# MANSI GOUDA

## *Social science-*

I think SST is an easy subject for me. We have covered almost all the chapter in SST, and we are revising for the tests.

## *History-*

I enjoy studying about the ancient world, the kings and queens, world war 1 and world war 2 etc. We have revised almost all the chapters in history.

We are revising for tests. I think all the tests were good and easy for me and I could do well. Two or three chapters are left to be revised and given test in.

I think we are studying history very seriously, because we have 2 days a week of history class and we have revised almost all chapters with tests. So I just need to read and practise from the examination point.

# MANSI GOUDA

## *Geography-*

We have such a nice natural surrounding (natural geography) here in Kechla, still I don't like geography. I feel history is more interesting for me than geography.

We are revising geography and doing tests. Though I never revise for test, I get good marks.

But to do better in exams, I need to study harder. We have geography class in the afternoon, so sometimes I feel sleepy, but I try to stay awake.

I think we are not having a serious class, so I have to be a bit serious.

# MANSI GOUDA

## *Political science-*

We had a gap of a few months in political science. Whenever bhaiya comes to kechla he teaches us the next chapter. When I study pol science .

I dream of becoming a politician because I like to read about how the people are elected, and what all they do during elections and many other things. But sometimes I think Politian's are very boring.

We have studied all the chapters and have revised for the test, but nobody is there to give us test, so our history teacher told us to keep revising.

She has told us that after we finish the history part, she will give political science test, so we continue revising.

# MANSI GOUDA

## *Science-*

Science is a difficult subject for me, but still I try to do it.

I have a problem in remembering exactly from the book, but to get full marks we have to remember exactly from the book.

I have to read again and again to remember the concepts clearly.

# MANSI GOUDA

## *Biology-*

I am clear in biology and remember almost all the chapters. I have to remember and practise the diagrams. Veerinder didi from Delhi had come to Kechla to teach us biology.

She is a retired biology teacher. We had done all the chapters in Delhi with her, so we just read and revised on our own and gave tests from all the chapters. All the tests went well and I enjoyed.

She had come to teach us for one month and we covered all the chapters. We had made charts in biology and some diagrams of the organs and have displayed on the board in the science lab.

Now I just need to go through the book and need to read it again and again, thinking that we are almost going to give exams. I need to get a bit serious then I can do well. I am thinking of taking biology in the future, so I need a lot of practise.

# MANSI GOUDA

## *Chemistry-*

I think, I am good in chemistry. I just need to remember the definition, diagram and different scientific names. We have covered all the chapters.

We just need to read a lot and give the test. From all the chapters, I am clear in most chapters and need clarity in other chapters. I think, to remember the concepts we need to do a lot of experiments.

That we do very little. So I need a lot of practise to write answers and I need to revise a lot.

# MANSI GOUDA

## *Physics-*

I am not clear in physics and need a lot of practise. I can understand the questions but I have a problem in solving the word problems.

We have stopped studying physics and are revising chemistry with proper definitions.

I need to remember the formulae, and if I remember the formulae, I think I can do it and need a bit of help from the teacher.

# MANSI GOUDA

## *English-*

I am doing English on my own, revising and doing question-answers from the book. I have taken some grammar books from the library and doing the grammar.

I am doing letter writing, essay writing, and some sort of grammar. I practised by doing some previous year question papers and it was easy. I wrote essays and did all the grammar. In some grammar part, I did wrong, so I had to correct it.

I have forgotten some of the stories, so I just have to revise it. I need to read the text again and again so that I can remember the story by heart. I need to do a lot of writing in English so that I am quick in writing, in tests or in exam. I have to do a lot more.

# MANSI GOUDA

## *Games-*

I have stopped playing other games and play only basketball. I have improved a lot. First my baskets were not going, now I have improved and most of the baskets go, if I have am lucky then all the baskets will go.

I can guard nicely and my layups have also improved a lot and almost all the baskets goes in layup, but when there are a lot of children guarding I get scared of falling and never try layup and just shoot blindly.

I enjoy playing basketball a lot. I just need to build my stamina and run a lot so that I get a lot of passes and I can enjoy the game a lot more. We have sports at 5:30 so we just start the game without any exercise which is not good. I play with the big children so I don't play any other game besides basketball.

# MANSI GOUDA

## SHRAMDAN

I love to do shramdan so I do all the shramdan. In shramdan we do yoga, kitchen, music, cleaning, and gardening. I like music. I enjoy playing flute. I am learning sitar and I can play songs and ragas on sitar.

Sitar is a beautiful instrument and the sound of sitar is very pleasant, so I liked the instrument and thought of playing the instrument. But mostly I concentrate on playing flute. Nowadays I am trying to play a big flute.

The sound of the big flute is very nice and when we play songs on the big flute it sounds really good. Some of the notes are not clear and I am not able to play *Koma*(soft) notes but still I try to play it.

In September some teachers from Delhi had come to teach us music, and I learnt sitar. And with a lot of difficulty I was able to play and the sound came. First, my hand pained a lot and there were black marks on my hand but still I played.

# MANSI GOUDA

Toilet cleaning is boring for me but still we have to do it. I can clean the toilet but never empty the dustbin. I don't like to clean the dustbin but we have to do it.

In gardening, I like to water the plants and grow plant and vegetables. We have grown Jamun and chiku trees. These trees are taller than me and new leaves are coming. I don't like to take out weeds from the field but I can cut them by sickle.

The most interesting work is kitchen. I like to cut vegetable and see how Nilamber bhaiya cooks tasty food. We are having yoga in the morning at 6:00 and I feel very lazy to get up but we have to go otherwise we get punishment.

I have never got any punishment but still I go everyday for yoga. I am much more flexible than before. I can do almost all the postures. And I like to do them.

# MANSI GOUDA

## *Trip-*

places we went- Jaisalmer, Chittorgarh, Udaipur, Gulabpura, Jodhpur, Falna, Ajmer, Jaipur, Pushkar. We saw Lake palace, Mehrangarh fort, polyester mill, Saheliyon ki badi, etc.

The monuments were really nice and interesting. The way they had made the place, animals and many things and the carving were also very interesting.

We had a guide who guided us and everyday I used to follow with the Guide and listen to what he said.

# MANSI GOUDA

I liked listening about the olden day kings and queens' life-style. It was great fun travelling with groups.

The facility in the houses were also nice and clean, but in Jaisalmer the toilet and bathroom were not clean but still I liked Jaisalmer because we had a camel ride and some programmes arranged near the desert and we got tasty food.

We clicked a lot of photos near the monuments. We had gone to many museums and parks. In the museums there were a lot of olden days' things. It was a lot of fun.
