

Vivek Mali

Date of Birth - 18th March 2004

April 2018 - March 19

English:-

Within a year I read all the stories of my course book and orally tried to do the question answers. I also did some practice tests by doing the previous year question papers.

I practiced some grammar from the grammar book; I also did some report writing, letter writing, paragraph writing etc.

Social Science: I cleared some doubts which I had while doing the previous question papers with Gauri didi and I completed almost all the question papers.

I read the whole course of tenth class and roughly glanced at the questions in the textbook. Before this, I with my classmates completed the whole course with bhaiya and did the question answers.

In bhaiya's absence we gave tests of the chapters we had completed. I scored decent marks but not all the time.

I found the SST class very interesting when bhaiya used to take our class and I used to love it. After completing my course on my own I prepared for my board exam.

Science: I had completed the science course and just practiced it once more. I also attended classes with Srinath bhaiya and I cleared some doubts in physics and chemistry. I studied biology too. Within this year Parthiv bhaiya had come.

We did some robotics with him. We made different robots and also learnt how to function them. He taught us some chapters of physics. We spent a nice time with him.

In February-March'19 Veerinder didi had come to make us revise the biology course. Within a month we revised the whole course. After completing each chapter we would give tests.

I used to do well in the tests sometime but not always. She would give us homework everyday. I had my practical's the next day to when she left and did my science practical in Koraput. I also practiced some previous year question papers and also did some practice papers and tests, which Srinath bhaiya would check. In these few tests, which I gave, I didn't do well.

Mathematics: I practiced the important examples, which are common and come in exams.

I also remembered the formulas of maths and gave some tests with a target of 90%. I find commercial mathematics very boring.

Trip To Rajasthan: We went on the trip in November. The first place we visited was Jodhpur. We reached there at night. We went to the fort. I felt a bit bored by walking in the sun. There I saw only one type of tree, (Keekar) which was planted by dropping seeds from a plane. The seeds had been brought from Mexico by the king because there were no trees or a very few trees in that area.

We visited the second largest palace in India. It was very beautiful. The name of the palace is City palace. It is located in Udaipur city.

We visited Jaisalmer. There we saw the religious places and learnt lots of things about it. We also visited the Jaisalmer fort. It is built on the top of a hill and is very beautiful.

Then we went to the sand dunes. There we had a camel ride and all of us had lots of fun. We all played in the sand till late evening and after that we saw the cultural dance of Rajasthan, which is called Ghumar. We enjoyed a lot. Then we went to Gulabpura; there we stayed in a hotel.

There we spent a luxurious night. In Gulabpura we visited the school. The paintings made by students were very well done.

Then we went to a temple and I didn't like it. Then we went to Mayur factory. It was very interesting and I liked it very much because we got to learn about the whole process of making yarn.

Then we went to Jaipur. There we visited Hawa Mahal and also saw Jantar Mantar. It was built very scientifically. The next day we went to bhuton ka bangar. It was very old. We got to know the architecture of different places and different types of sculpture that was done on the temples.

I enjoyed the most in Gulabpura and Jaisalmer because we played in sand dunes the first time and had a camel ride.

I also liked the food we got to eat there after the programme.

Sports: I didn't go for playing much because my board exams were approaching. So the few days that I went to play, I didn't have much improvement. I used to do some stretching and directly play the game.

My favourite sport is football so I used to play football.

I do lots of running while playing but not before that. I only play basketball and football.

I only like to play basketball when bhaiya is there, because I have fun when we have a competitive game. The first two to three months when I played football, I had improved my kicking power and I could kick from one goal post to the other.

My shooting in basketball improved very well that almost all the balls would go in the basket.
