

NIRAJ MUDULI

2021-22

DOB- 11th September'05

Introduction

My name is Niraj and I am 17-years old. I would be appearing for my 12th exams from NIOS (National Institute for Open Schooling) in April'22. The subjects that I have taken are Home Science, Data Entry, Painting, Physical Education and English.

I have a good time with my friends in the school.

the subject in 10th and then again in 12th. In 12th I got to learn a new chapter and it was very interesting. I did many things in this chapter.

Home science

In 10th I had the subject of Home Science. It was simpler and I could understand and memorise the concepts easily. However, in 12th it is relatively more difficult. I solved many previous year question papers as a preparation for my exam. I took the help of didis whenever required.

Data entry

Data Entry is my favourite subject. It was a very easy subject for me, as I could remember the concepts and topics very easily. I studied

English

I read many stories and poems from the textbook of class 12th NIOS. They were very simple and interesting. We had online classes with Ragini Didi. She taught very nicely and I enjoyed her classes. We also learnt letter writing

and addressing the envelope in the class. Whenever didi gave us homework, I did it promptly and properly. I practised many previous years' question papers for revision.

Painting

Painting was a bit difficult because I didn't know how to draw. I had online classes for theory. I learnt

about many famous paintings in the class. I did the practical part by myself. I made all the drawings and paintings for the practicals. It was difficult, but I completed them in a month.

Physical education

I enjoyed studying this subject. It was about the physical fitness of a human body, how to take care of it. It was also about the different games and how they help our body. I could understand the chapters, but it took me time to remember

them properly. It was a new subject for me, but I studied the subject nicely. As the subject has been recently introduced, there was only one previous year question paper, so I solved the paper. I tried to give my best in the exam.

Games

I like to play all the games. The different games which I play are football, basketball and volleyball. My favourite game is football. I like to play basketball and I need to improve my shooting. I like to play

volleyball and I play once in a week. In school, we celebrate sports day and the entire school participates and plays many types of games. We also did long jumps and high jumps. We had races on sports day and the timings of running, lengths and heights of jumps were recorded so that the children would improve in sports.

Celebrations

There are many occasions which we celebrate in our school. Some of them are- Diwali, Holi, School's birthday, Janmashtami etc. On each occasion, every group participates in the programme. They put up plays or perform dances and songs on the stage. I also participate in the programmes. On Janmashtami, our group had presented a play about Krishna. I had taken the role of the demon Kansa. In the village many festivals are celebrated, and we participate in the festival.

Shramdaan (Work Offering)

I like to do shramdaan. There are six activities that I do in shramdaan, viz. toilet cleaning, hostel cleaning, kitchen, school cleaning, gardening and room cleaning. We have room cleaning on Sundays. We do the shramdaan in the morning from 6:30- 7:30. On Mondays we go home in the afternoon at 3:00 pm. I usually come back in a few hours but am allowed to stay home till next morning.
