

VIKRAM JANI

DOB- 18th August'08

Attendance- 183 out of 183 days

Report for 2023-24 (First Term)

My name is Vikram Jani. I am in the 10th standard and have recently completed my exams at the AMVM school. I am passionate about playing, with football being my favourite game. My hobbies include reading novels, watching movies, and playing games. Science is my favourite subject, and I have good handwriting in all subjects; I just need to increase my writing speed.

English

I have completed the entire English course. All the chapters in the book were straightforward, enabling me to answer all the questions. In this class, we engaged in various activities such as free reading, group reading, and grammar. My English exam will take place on 10th October 2023, and I am sure that I will find all the questions manageable, allowing me to solve them within the allotted time.

Hindi

My Hindi teacher is Manisha didi. I have completed the entire Hindi course and will be taking the exam. In this class, we covered free reading and grammar. I enjoyed the class, though on warm days, I tended to feel sleepy. My handwriting is good, and I can write quickly when needed. I took whole book tests in Hindi.

Social Science

I have completed the entire Social Science course and will be taking the exam, which I am sure will be quite easy. The subjects included History, Geography, and Civics, with Geography being my favourite due to my interest in Earth's mysteries. I used to score well in tests of all three Social Science subjects and feel clear about most of the doubts I had.

Science

The Science course and its exam have been completed. I revised the entire book with my Science teacher, Ambika didi, before the exam. I passed tests with good marks and found the questions very easy. I hope for a good score.

Maths

I completed the entire Maths course and will be taking the exam. Before the exam, my Maths teacher conducted whole book tests, and I performed well in all of them.

Computer

In computer class, I usually do typing in Typing Master with a speed of 53 words per minute at the maximum. Sometimes, I also engage in painting and drawing.

Celebrations

Due to exams, I did not participate in most festivals. However, I celebrated them by mostly doing anchoring, which helped me overcome my stage fright.

Shramdan

During Shramdan time, I studied maths with Bikanti didi from 6:30 to about 7:45 a.m, and I enjoyed this class as it freshened my mood in the morning.

Games

My games are from 4:00 to 5:15 p.m. Before games, we do exercises. I play various games, including football, basketball, frisbee, and volleyball. Football is my favourite, and I enjoy trying tricks like the rainbow flick and Maradona's spin on older players. I typically score one or two goals in most games.
