

LALU KRISHANI

Date of Birth: 1st Oct 2002

New Creation

Report

Lalu was finding maths very difficult so he did not appear for maths exam in October 2017. He started studying maths and data entry from November and he did not face any problem. Lalu is a very obedient boy. He tries to help everyone. Any physical work and lalu is ready to help.

Self Report

I had my 10th board exams so I was studying for that. I was learning history with Annapoorni didi and I liked her class because she would give notes and take chapter wise tests early in the morning. I studied science with Meeta didi. I felt bored in her class because she would read fast and she gave very few notes. With Utsav bhaiya also I did science. On fifth July we had our school birthday and on that day we planted trees in the school. In end July Parthiv bhaiya and Bhuvana didi had come to teach us science. I studied biology with Bhuvana didi and physics with Parthiv bhaiya. I made robots with him. On 16th August I left for Delhi for my studies.

When I came to Delhi, I studied chemistry with Srila didi, physics with Prakash bhaiya, biology with Veerinder didi, English with Simran didi and some parts I had done with Sangita didi and social science with Annupoorani didi and we had almost covered it. Most parts of hindi were finished with Vidyottma didi so we were revising and covering the parts which were left, with Yogesh sir. I studied till October and gave some papers. After giving at the end of October I went back to Kechla for studying maths with Srinath bhaiya. I enjoyed with him.

We had gone to bring our new boat and we assembled it and also painted it. And after painting it, we went for picnic and drove the boat but in the middle it got spoilt and it roamed like a nomad.

With Srinath bhaiya I had almost finished the whole book. Then in February we again came back to Delhi to give my math practical. So in April I finished my exams. After finishing I went to MIS for sport training and I did for 1 week. Then went back to Kechla and in summer season I went for swimming with small children and Pranjal bhaiya. I also taught maths to gratitude and humility groups.
