

Bhavani Majhi

DOB-02-Apr-18

Report for 2022-23 (First Term)

Bhavani is a sweet little girl, but she is quite irregular to school. So, her participation in the group activities is very limited. She is shy of didis, and therefore she feels uncomfortable with them. She tries to talk with her friends.

She still needs time to learn the Hindi language properly as she speaks in the village language to the other children. She stays neat and clean. She likes to wear the clothes given by didi. She likes to eat only rice, dal and potatoes and likes to drink milk. She needs to develop her taste for other vegetables too.

Chanting

During chanting time, she tries to recite all the mantras although she has learnt only a few of them. She sits still and keeps her eyes open while chanting. While singing, she sings softly and does few actions when she feels like, by imitating others. She will gradually learn and like the songs and also enjoy doing the actions, although she stays calm and silent most of the time.

Dance

She takes less interest in dance. At dance time, she just becomes the audience and watches others. When she is asked to dance, she just looks at didi and avoids her.

Drawing

She is decent in arts and she tries her best to improve, during art class. She tries to do her work quietly but loses interest quickly and therefore gets distracted easily.

Games

She enjoys playing games. Her favourites are fun games, so she participates only in them. She also participates in the group activities which didi makes them do. Still sometimes she stands

aside and watches her friends after doing some running and exercises.

Mathematics

Bhavani likes to do maths with objects. She has learnt counting till 10. She faces difficulty in answering the question which didi asks in maths class. She needs special attention from didi.

Movies

She is unable to build much interest in movies. Gradually she might increase her interest in them.

Bhavani has the capability of doing all the activities which are done during the class, but she still feels

insecure about herself. She needs to open up and express her thoughts and feelings to didis and her friends.
