

Kartik Muduli

DOB- 29th October'14

Attendance- 183 out of 183 days

Report for 2023-24 (First Term)

Maths

Kartik attends math class in the evening at 7 o'clock. He has completed the second book and is currently studying the third. Kartik sometimes daydreams and gets sleepy during class. He learns concepts faster

when he is interested but can be lazy at times. He particularly enjoys division and multiplication and recently learned about shapes. Kartik is making efforts to improve his mental calculation and concentration.

Projects-

Birds

Kartik's enthusiasm for bird watching outshone all other activities in the group. He marvelled at birds in flight and perched on branches, with the

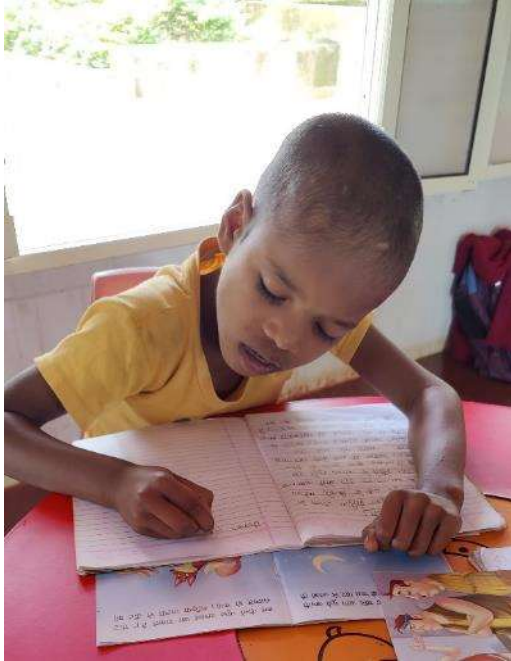

kite being his favourite for its unique flight style. He created a parrot diagram and coloured it independently. Kartik actively participated in class, contributed to group discussions, and demonstrated an understanding of bird-related topics. He categorized birds into groups, memorized bird body parts, and grasped new concepts such as migration. His eagerness to learn and enthusiasm for the bird project were evident in his active participation and dedication.

Occupation

Kartik wants to become a scientist when he grows up because he wants to invent new things like the other scientists had done. In the class he had made a very beautiful picture of a scientist. He had also coloured the picture very beautifully. When the teachers ask him some

questions then he answers in full sentence. He sits quietly and listen to the teachers.

Hindi

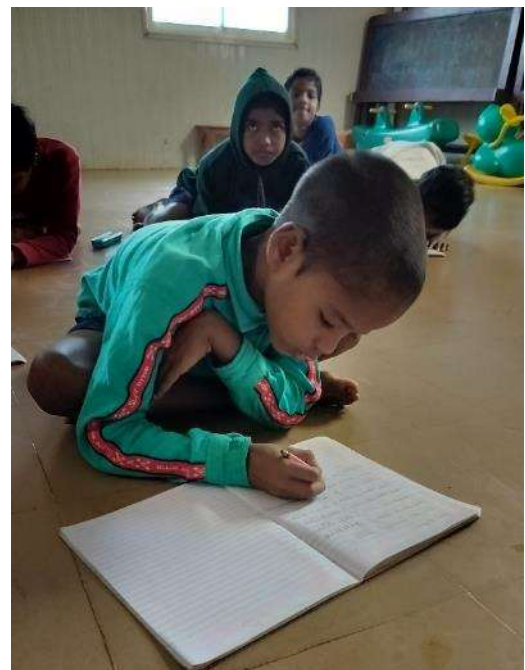

Kartik is a smart and diligent student. He excels in reading and has completed

writing small sentences. He has also started writing stories. While he's proficient in storytelling, he needs to work on improving his sentence structure. Kartik enjoys dictations and performs well, making few mistakes. His handwriting is neat and clean. He consistently completes his homework and has his notebook checked daily. In grammar, he quickly comprehended the concepts and overcame difficulties in "Varna Vichhed" with practise. While he may take some time to learn songs and poems, he persists and repeats lines after the teachers. Kartik is currently learning Havan chants, though pronunciation of some Sanskrit words remains challenging for him.

English

Kartik is a quiet and endearing young boy who possesses a genuine fondness for his English class. He consistently attends his classes with enthusiasm and demonstrates a strong interest in speaking the English language, despite encountering challenges in pronunciation. Kartik makes genuine efforts to converse in English, even if he may not always pronounce words correctly.

Although he tends to be somewhat restless during class, he actively engages in learning and

listens attentively to the teacher's instructions and storytelling. On occasion, when he finds the stories less engaging and feels drowsy, he may inadvertently fall asleep. However, he readily complies with the teacher's request to stand briefly, effectively shaking off the drowsiness and regaining focus on the lesson.

Kartik has made notable progress in his reading skills, currently being able to read storybooks at the 3rd level. He isn't hesitant to seek assistance from the teacher when encountering unfamiliar words and takes the initiative to ask for explanations. Additionally, he can retell stories after reading them without referring to the book.

During group reading sessions, where each student reads a paragraph, Kartik displays an ability

to read independently without relying on the teacher's guidance. Following group reading, dictation exercises are administered. In this context, Kartik correctly spells some words while making errors with others. However, he diligently practices and writes the misspelled words five times to improve his spelling.

Kartik's strong memory is evident, as he memorized his lines as the narrator in an English play performed on Janmashtami. He quickly grasped and delivered his dialogues effectively, contributing positively to the play.

Kartik has a strong interest in watching English movies, even though he understands very little. He loves acting in plays and sings well, with a sweet voice. While he tries to

memorize dialogue lines with proper pronunciation, he should concentrate more when learning poems.

Odia

Kartik is an intelligent and quick learner. While he possesses a good memory, he sometimes gets distracted in class. He can speak a few words and sentences with correct pronunciation. Kartik is highly motivated to learn new things, especially the names of objects in nature.

Arts and Crafts

Kartik is very interested in the art class because he likes to draw different types of objects with colours. He also likes to draw cartoons and he is always happy and attentive in the class. He likes to do oil pastel drawings. He is very good in art and his drawings are neat and clean.

Puzzles

Kartik is an obedient child who always pays attention to didi. He can successfully complete 90 and 100 piece puzzles. Kartik has a keen interest in puzzles, particularly the larger ones.

Games and Sports

Kartik is the teddy bear of Boron group during games. He likes to do exercises like sit up, side sit up, jogging. Football is his favourite game.
