

Mohan Jani

Date of Birth- 9th August 2003

April 2018 - March 2019

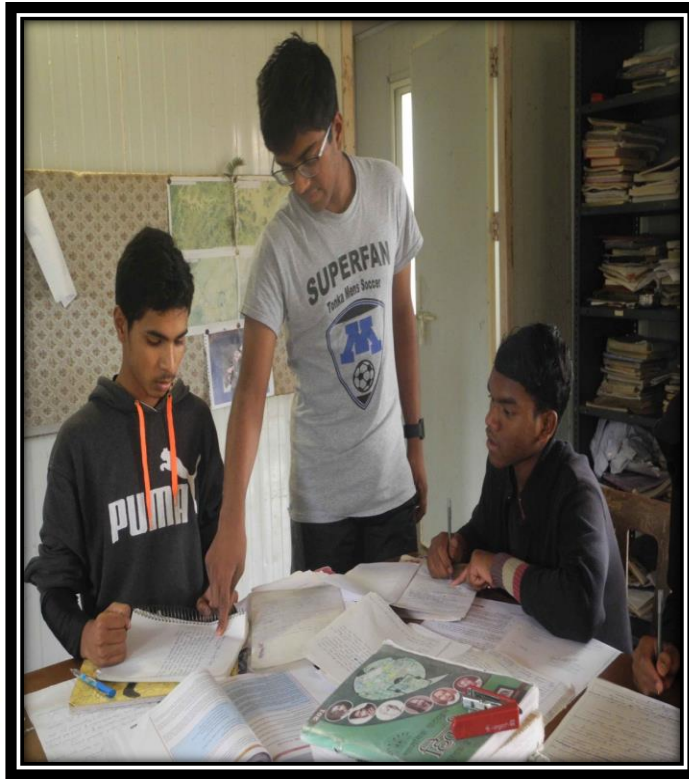

□ English

In English my speaking style is not good. I started my Class 10th book in Delhi with Lakshmi didi.

She would come from outside to teach. We studied all the stories from the book and then solved the terminal and In text questions.

There were some grammar parts like letter writing, message writing, report writing. I have problems in writing the correct words.

On returning from Delhi we revised the stories and solved the questions. When Pranjal Bhaiya was not here, we studied by ourselves.

□ Hindi

We studied the stories from the book and solved the In text and terminal exercise.

Vidyottma Didi gave us tests for practise. I get confuse on putting the *matras*.

My writing speed is very slow, that's why I have problem when didi gives dictation.

Two months before exams, Didi would make test papers for practise.

Then she gave us previous year question papers to solve, in which I got 56/100 in 1st test and 73 in the 2nd test.

I also had problems in writing essays. I could not think about the topic and write about it.

In the first test I got 15 out of 30 marks. Afterwards I improved a little. I was able to attend all the questions.

☐ Science-

I am very poor in Science so I don't like it very much. In all the tests I got very less marks and teachers didn't liked it. We studied with Srinath bhaiya.

He taught us the difficult chapters once more and told us to solve the questions of the book.

There are three subjects in tenth- Physics, Chemistry and Biology.

I had difficulty in all three subjects. Bhaiya used to give some problems from Chemistry and Physics. We had made notes of these chapters so we had to just read the notes and solve the questions again and again.

At first I couldn't solve the problems of Physics, but by doing many times I could solve. After that we revised by ourselves and prepared for the board exam.

□ Social science

From January 2018 we had started studying the tenth syllabus of social science. I didn't like political science because I couldn't understand the work of political parties and the Parliament.

If I couldn't understand the chapter I would only go when bhaiya would ask me. I used to get good marks only in geography and little bit in History but not in Political Science.

□ Mathematics

In October 2018 my board exam started. I appeared for four subjects in October. After that I had to study Mathematics.

I started after my Rajasthan trip. I finished my two textbooks in four months, but I had problems in chapters on percentage, Factorization, a little bit in congruency of triangles and similarity of triangles.

After that I revised the whole book once more by giving tests and answering the questions of RS Aggarwal.

I was told to solve question papers of previous year.

In the first test I got 26/85, in the 2nd test I got 63/85 and in the 3rd test I got 42/85. From those tests I got some knowledge about how it will be in the board exam.

In percentage I had problem in word problems and in factorization I couldn't solve the equation.

I will appear for my board exam for math in April 2019.

I like maths a little bit but not much. I have a bit of a problem in memorising formulas. I have decided to leave science and math after my tenth exam.

□ Sports

In sports I just played football.
I used to play football with
Aspiration group and with
some older boys.

My best sport is football. I am
planning to join sports. I have n
o coach, so I just practise
with my friends.

I was not worried about my board exams. I was sure I will pass.
I stopped playing other games and just played football. In football m
y skills have improved but need to be better.

Whenever children don't come to play, I just call a twinkle group child and practise my shooting. My dribbling skill has not improved.

Whenever I would get some problems to solve in maths or some formulas to memorise I would not go for games.

We have no coach that's why I just watch some players video like Messi, Ronaldo and Neymar. They are my best players from where I learn skills.

□ Trip To Rajasthan

We went for a 15 days trip to Rajasthan. We started for on November 14th and reached Jodhpur on 16th at midnight.

The next day we visited many forts. I liked the places but I was feeling bored because it was too sunny.

After breakfast our next place was Rao Jodha Rock Garden.

We got to know about different types of Trees and rocks. After that we visited many places like Jaisalmer, Gulabpur and Jaipur.

While we were in Jaisalmer we went to the Sand dunes. We got to ride on camels. It was fun sitting on the Camels. The camels were getting up as if we all will fall down.

We visited the cloth mill in Gulabpura and Hyundai showroom in Chittorgarh. There we saw crashed cars being repaired.

In the whole trip I liked the Sand dunes very much because we played there dragging each other on the sand.
