Introduction

My name is Pranav, and I study in the Perseverance group. I am studying the 7th class books, and I like studying all subjects.

MATHS

I like Maths class very much because there are many topics I enjoy. I like to do the concepts of integers, fractions, and algebraic expressions. After I finish each chapter, I revise for the test and then take it. Sometimes I get confused and end up writing the wrong answers. I have given many Maths tests, and I have failed sometimes, but I try my best to improve my skills. After I give the test, I move on to understand the next chapter. Once I understand a chapter, I solve the questions I have understood very quickly. For the questions I don't understand, I go to Bhaiya for help. After I finish one exercise, I check it, but sometimes my calculations are wrong while solving the questions.

SCIENCE

I am studying from the 7th-class science book. I like this class very much. Sometimes, I cannot solve a question, so I ask Bhaiya for help. I have done many experiments on acids and bases. If I do not understand a chapter, Bhaiya helps me understand it again and again. Sometimes Bhaiya tells us interesting facts related to the chapter. I have passed the tests, but sometimes I have failed.
