

Rukmani Mali

Date of Birth -May-10

Report for 2022-23 (first term)

Introduction

My name is Rukmani Mali. I study in Auro-Mira Vidya Mandir. As per my age, I should be in class 7, but I am studying the course of class 10 in most subjects. I like my school because it is a very peaceful place. I enjoy doing mathematics, playing basketball, dancing and singing

songs. I had gone on a school trip to South India and really enjoyed it a lot. We saw many beautiful temples and also went to see Pondicherry and Auroville.

Hindi

We have finished both the books of Hindi. Krishna didi from Delhi had also come to help us and she taught us grammar. After finishing the book, we copied

some paragraphs from the books to improve our handwriting. In the class, we read books and our didi explains the chapters to us so that we can understand them better. We do many other activities during the class which helps us in learning in a better way. We have started revising the syllabus once more.

English

We have finished Book 1 prescribed by National Institute of Open Schooling (NIOS). After finishing the chapters, we attempt the questions and answers given at the end. We are giving tests of all the chapters one by one. Sometimes I am able to

score well but I know that I need to work harder to be able to do better. We have already started the second book and finished two chapters. We do free reading and group reading as well. In group reading we read stories on Kindle. We have also learnt letter writing, notice writing and message writing. I have to improve my handwriting and spoken English. I love reading stories in my free reading time.

Mathematics

In the month of April I was doing Book 7. I finished the book in August and took a test from the entire book. I tried my best and scored 48 percent. I found the chapters on mensuration, unitary method and algebraic expressions difficult to understand. So, I did revision from the book by R.D. Sharma. Recently I have started doing Book 8. I could do most of the chapters but found word problems difficult and could not solve some questions. Didi told us to read the statements again and again and then we would be able to understand and solve them. It was a good plan and it worked. I like doing mathematics and solving the questions.

Social Science

In Social Science we are doing the 1st book. We have finished Geography and are doing History. I liked the chapter on Climate.

Sometimes we watch news and videos related to the topics we are studying so that we can understand better. The chapter on Biodiversity was a little tough. Every time we took a test, I was not able to do it well in the first round. I needed to revise it again to score good marks. I love History as I am interested in learning about life in ancient

times. A lot of concentration is required from our side when didi is explaining the chapters.

Science

In science we are doing the second book of the NIOS course. We write notes and also do activities in Science.

In Chemistry, we are doing the chapter on Carbon and its compounds. I find IUPAC names of the compounds difficult to memorise. I liked the chapter on Acids, Bases and Salts although it was a little difficult to remember the formulae.

I like Biology a lot. We have finished 2 chapters. Meeta

(Bisen) didi from Lucknow came for a month and taught us Biology. We have also given the tests of these chapters. Didi gave us notes on the chapters she taught and she also showed us how to make diagrams.

In Physics, we are doing the chapter on light energy. We have completed the chapter on Thermal energy. We did many activities which helped us to understand these topics. We all enjoyed doing the activities.

Odia

In the Odia class we do reading and questions and answers. We also learnt a song which we performed on the Independence Day. I like the Odia class. I like to read books in Odia because I want to improve my reading skills. We also did a quiz and I did quite well. We are doing Book 4. We had also written a story about Sri Aurobindo.

Art

In this class we do drawing, painting, quilling, etc. We made many paper flowers which were used for decorations. We had also made hanging things and once we had made flowers with clay. We were not able to do many activities because we had to go for the school trip.

Dance

I really like the dance class. We have learnt various dance forms like contemporary, classical, jazz, etc.

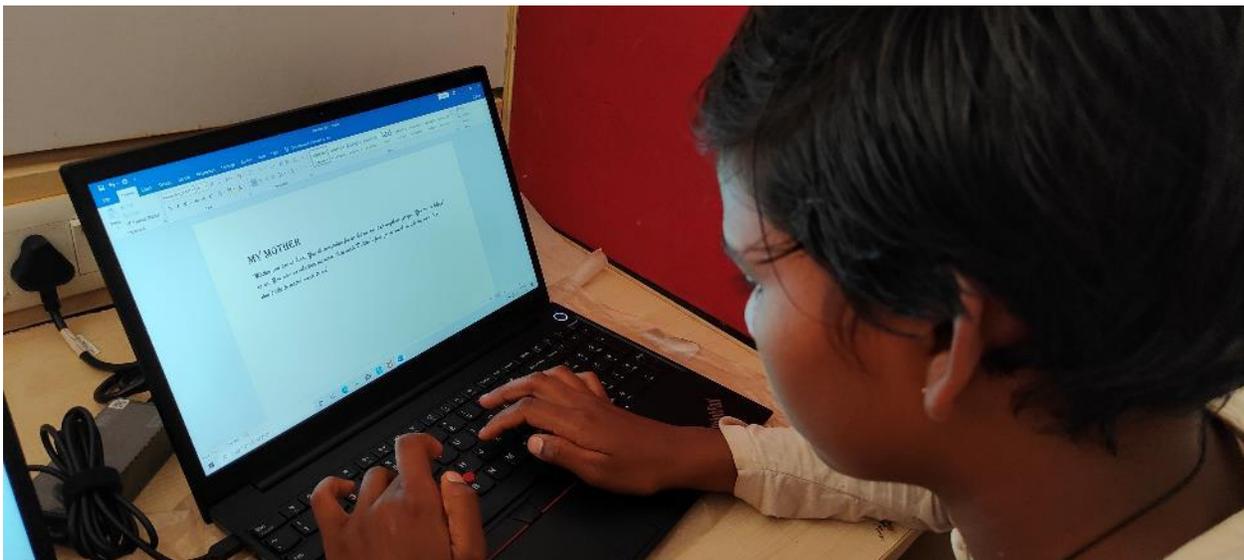

We learnt jazz from Danish bhaiya. He taught us many interesting steps which were easy to follow. We also learnt a dance for performing on the Independence Day. Everyone liked our dance performance.

Music

I enjoy the music class a lot. My instrument is Flute and I am good at it. We have learnt a new raaga which is Raag Bilawal. I played it well except when I had to play the taans. I like to play songs. I am interested in learning new raagas and songs.

Computers

In computers we do painting and learn typing on typing master. I like this class and I like to write stories and do typing master. I

am trying to improve my typing speed. We copy from the books to improve our typing accuracy and the speed of typing.

Sports

We play many games like basketball, football, volleyball, etc. My favourite game is basketball. I can't play volleyball properly. I always do running and warm up exercises. I always come for games on time. While playing a formal game, I am sometimes not able to shoot a basket but when I am practising, I can always shoot baskets. I love playing all types of games.

Shramdan

In Shramdan I clean the girls' hostel. We clean toilets, the staircase, filters and the floors. We do it in groups. Sometimes we finish the Shramdan very fast. In gardening we take out the weeds and water the plants. I like to do gardening.

Trip to South India

We went for the trip on 17th of August. First, we went to Vishakhapatnam. We saw the Simhachalam temple. In Kanyakumari we saw the Vivekanand rock and many temples. We saw the sunrise and sunset. We went to Madurai and Rameshwaram. In

Pondicherry, we went to see Auroville and the solar kitchen. We also visited the museums and the sea beaches. We went for boating and saw the colours change in the two beaches. We had a very good time and enjoyed the trip.

Celebrations

We performed a dance on July 5 and also took part in a play called 'OUCH'. I did my role very nicely. On the day of Rath Yatra, we

pulled the rath from the school to the hostel. We also danced as we moved on the road. We did a Pooja before bringing the rath. On the Teachers' Day, we sang a song, participated in a play and performed a dance. We also requested the teachers to play

games which we had designed for them. For the Independence Day, we did a dance taught by Denis bhaiya and a drama on Sri Aurobindo's life. We also did many other activities like oration, painting, quiz, etc.
