

# Mukti Jani

Date of Birth - 4th November 2003

April 2018 - March 2019

Mukti is 15 years old now and has been in school for over ten years.

She is differently able and has a very low IQ.

Till a few years ago, the teachers would be giving her individual attention and work on her language skills and math's.

Mukti would also make an effort to learn. But as the level would not be improving, she would be repeating the same books again and again.

Soon she realized that children her age are going at a much faster pace and she would then unilaterally decide to change her group and go with younger children.

She did that twice. First by going to the aspiration group and then to humility group.

But this year she has got bored of that as well.

Mukti decided to stop staying in the hostel and start going home and staying with her mother (single mother).

It is just as well as she will soon have to start doing something besides schooling.

Mukti is physically fit, has a decent height and is strong.

She at times participates in sports with the younger children.

She spends a lot of time in the library. She would read comics or simple story books.

Often she would not be reading but only looking at pictures.

When in a mood, she would go and join any of the younger group children in their activities.

# Mukti Jani...!
