

Shamika Muduli

DOB- 13th July'08

Attendance- 176 out of 183 days

Report- 2023-24 (First Term)

Introduction

My name is Shamika, and I have a deep passion for art. My dream is to become a renowned artist, and I have been working hard to improve my skills. I am now studying the 12th-grade curriculum, and I have been diligently working on my studies. I'm 15 years old, and I am known for my frank and friendly personality. Besides my love for art, I also enjoy playing basketball and frisbee. I find the 12th-grade curriculum to be interesting and relatively easy to study.

I have also taken on the role of teaching younger children, which I find very enjoyable. I have completed my 10th examinations of NIOS board and have

got good marks. My marks of the subjects are: - Hindi= 90%, painting=82%, Science=73%, English=64% and Science=76%.

I found the exams quite enjoyable. Initially, I was a bit nervous, but after completing the first exam, I gained confidence that I could handle them well.

Shramdaan

I have a great interest in Shramdaan, and I always listen to our teacher (didi) during these activities. Engaging in Shramdaan is not only enjoyable but also contributes to my daily life. It's an interesting experience as it keeps our surroundings clean, which I find very satisfying.

Academics

English

I have been studying the 12th-grade English curriculum online with the help of a teacher (didi). I have successfully completed the book, and I found the experience to be very enjoyable. I believe I have a good understanding of the subject.

Social Science

My study of the 12th-grade Social Science curriculum, also conducted online with Rachna didi, has been quite intriguing. I have gained a better understanding of the subject, and I find it relatively easy to comprehend.

Games

I have seen a significant improvement in my skills related to sports and games. I regularly go to the field to play and practice. Basketball is a sport I particularly enjoy, and

I have made considerable progress. I am putting in my best efforts to excel in sports, and I always pay close attention to the guidance from our teacher.

Celebrations

In the past few months, there have been several festivals to celebrate, though I was able to participate in only a few of them. I thoroughly enjoyed celebrating festivals like Janmashtami and Ganesh Chaturthi. Initially, I was nervous when I had to perform on stage, but as I gained confidence, I danced along with my companions, making the experience enjoyable and memorably.

Volunteering

Volunteering brings me immense joy, especially when I'm teaching small children. I dedicate my time to these young learners from 9:30 to 11:30, and during this period, I engage in teaching activities like counting, singing, and storytelling. Teaching these little ones is a delightful experience for me. I genuinely love guiding and nurturing their young minds. I consider myself fortunate to have the opportunity to teach these intelligent children. They are always attentive and eager to learn, which makes my teaching experience even more enjoyable. They quickly grasp whatever I teach them, whether it's painting or solving puzzles. Through this volunteer work, I've not only shared my knowledge but also gained a deeper understanding of the challenges and rewards that teachers face when working with children.
