

Pallavi Krisani

DOB- 27 September 2011

Report for 2023-24 (First Term)

Attendance- 181 out of 183 days

INTRODUCTION

My name is Pallavi Krishani, and I study at Auro Mira Vidya Mandir. I am 12 years old, and I am a part of the Progress Group, where there are 15 of us. Initially, we used to have many arguments, but now we get along well. We have become friends, helping each other and speaking politely. My favourite game is volleyball, and I always make sure to be on time for our games.

SHRAMDAN

We engage in various types of shramdan, such as kitchen work, girls' hostel cleaning, toilet cleaning, boys' hostel cleaning, gardening, and school cleaning. I particularly enjoy school cleaning, and I

always pay attention to what didis and bhaiyas assign us to do. I make sure to be punctual.

YOGA

I have been attending yoga class regularly. If we ever received scolding from didi, it has helped me become more punctual. While I may not be able to perform all asanas perfectly, I make an effort. Sometimes, I do get distracted by my friends.

SCIENCE

I have a great fondness for studying science, and it happens to be my favourite subject. Currently, I am immersed in the "Refraction and Dispersion of Light" chapter. Over the course of our studies, we have covered several chapters, including "Force and Pressure," "Friction," "Sound," "Natural Phenomena," "Reflection of Light," and now, we are delving into the intricacies of "Dispersion of Light."

Among these chapters, I found the "Sound" chapter to be the most straightforward. However, the "Chemical Effects of Electric Current" chapter posed a bit of a challenge. The introduction of many new and unfamiliar terms and concepts required time and effort to become acquainted with. Nevertheless, I am determined to grasp these new. Our approach to learning involves a combination of theoretical concepts and practical experiments. We conduct experiments related to specific chapters such as light and sound, refraction, and reflection of light. This hands-on approach helps us not only to comprehend the theoretical aspects but also to remember definitions and concepts better. For instance, we explored gravitational force, electrostatic force, and the effects of friction, and we observed the oscillatory motion of a pendulum.

In the chapter on "Natural Phenomena," we had the opportunity to experiment with electrostatic force. Using a charged comb, we demonstrated that pieces of paper are attracted due to this electrostatic force. These experiments have been both enjoyable and enlightening.

I am diligent when it comes to completing homework assignments provided by our teachers, and I make a concerted effort to be punctual for class. However, there are occasions when I arrive late on the days I commute from home.

Despite my enthusiasm for science, I acknowledge that I need to refine my focus in class. At times, I may become distracted by my friends, and occasionally, I fail to pay adequate attention during lessons. Consequently, I need to work on enhancing my attentiveness during class time.

In tests, I have consistently achieved good marks, and I can typically answer questions independently. However, if I encounter doubts or uncertainties, I do not hesitate to seek clarification from my teachers. As I continue my journey in the world of science, my goal is to improve

my concentration and actively engage in the classroom, minimizing distractions from my peers.

MATHS

I am studying the 6th book in maths. I find it enjoyable, with my favourite chapter being the one on integers. So far, we have completed 8 chapters, and we are currently working on the linear equation in one variable chapter. I find the ratio proportion chapter a bit challenging. Didi explains the chapters on the board, and then we proceed with questions, group revisions, and tests. I actively participate in class discussions, although I do occasionally get distracted by my friends. Initially, my scores were not very high, but they have improved.

HINDI

I am currently studying the 7th book (Vasant Bhag). In Hindi grammar, I have just finished the book and will be taking chapter-wise tests before the final comprehensive test. We engage in various activities like group reading, free reading, copywriting, story writing, dictation, and grammar exercises. Out of all these, I enjoy dictation the most. However, at times, I don't enjoy group reading because some children read very slowly. I occasionally make mistakes with matras (diacritical marks). I am working on improving my Hindi writing skills. The process usually involves going to our teacher (didi) to understand the chapters, answering the questions, and then taking tests. Whenever I face difficulties, I seek clarification from didi. I actively participate when didis are teaching something, though I do get distracted by my classmates on the side benches from time to time. My reading skills are quite good, but my writing speed falls somewhere in between – not too fast, yet not too slow.

I have already completed the Vasant Bhag book, which includes poems and stories. I can easily answer questions related to the stories, but I find the poems a bit challenging. On Chachaji's birthday, we performed some jokes and stories related to Chachaji in Hindi, and I thoroughly enjoyed being on stage.

ENGLISH

I have a strong interest in studying English. I have successfully completed the communicative book for the 4th grade. Additionally, I take tests after each chapter to assess my understanding. In my English studies, I engage in various activities such as group reading, working with the communication book, occasional grammar exercises, story writing, and dictation. I particularly enjoy dictation exercises. My spelling skills are good, I write with a quick pace, and my reading style is commendable. However, I recognize that my handwriting needs improvement, and I am actively working on enhancing it.

In addition to these activities, I also participate in singing, language games, and occasionally write messages, essays, and notices. During my free time for reading, I explore books of my own choice. In group reading, I've had the pleasure of reading two books from the Harry Potter series, and I am currently immersed in R.K. Narayan's "Swami and His Friends." I find it easy to understand and enjoy the stories I read.

Whenever didi assigns homework, I make sure to complete it diligently and submit it on time. I am consistently attentive in class.

On the 5th of July, I had the opportunity to perform in an English play, "The Three Trees," and sang a song for Janmashtami, "Piya Tose." I found both experiences enjoyable and relatively easy. I had the role of a narrator in the play, which I chose for myself.

While I admit that I need to improve my spoken English because I haven't made much of an effort in this area, I am committed to working on it and doing my best to enhance my English speaking skills.

SOCIAL SCIENCE

I like doing social studies. We study history, geography and civics. I like doing geography the most. Civics is little tough. When didi discusses anything I concentrate and I am active. In tests I get good marks still I will work hard do it better. History syllabus is about to get over, I found the chapter on crafts and industries little tough.

MUSIC

In music class, I learn to play the harmonium. We study various rags and alaps, as well as songs for our programs. I enjoy my music class, and if didi is not available, we go for assembly.

ODIA

I am not particularly fond of Odia. In Odia, we read books like Manapabana and Sishu Bahi, with Surekha didi as our teacher. She teaches us well and occasionally shows us movies. She reprimands me when I speak in the local language, and she helps me when I struggle with Odia. Sometimes, she teaches us songs.

ART

Our art class covers various activities, including painting, drawing, using pistachios, and stencils. We are currently learning how to use a cutter. I

always attend art class and enjoy it. Sometimes, we create hanging decorations. With a new teacher named Lakshmi didi, we have made items like fish, oars, baskets, and flowers, which I thoroughly enjoyed.

DANCE

I have a liking for dance. We learn various mudras, and didi teaches us many dances for stage performances. We performed a Goa dance on July 5th and a dance on a Ganesh song for Ganesh Chaturthi. If didi teaches us steps, I listen attentively. If I still struggle with the steps, I learn from my friends or occasionally ask the teachers. We have three teachers for dance - Brishti didi,

Suparna didi, and Gauri didi. I enjoy dancing with them.

COMPUTER

In computer class, I study with Lalu bhaiya. Sometimes, we practice typing, and other times we engage in painting. I find painting enjoyable.

GAMES

I like playing games, with volleyball being my favourite. However, I now enjoy playing all types of games, including basketball, volleyball, frisbee, football, and minor. We start with running and exercises before playing. Occasionally, I do feel tired, but I still enjoy it.
