

JAGAT NATH

Date of Birth: 17th Nov 2002

New Creation

Report

Jagat appeared for class 10th exam in October 2017. He is the first student of our school to have opted for science. He has been in Delhi since November. Jagat is very independent and disciplined. He is studying physics with Prakash bhaiya and chemistry with Hema didi. He did class 11th maths with Archana didi and Monika didi and is doing class 12th with Monika didi. We never have to tell him to study or not waste time. He knows what to do when.

At most times other children of Kechla are here. Jagat feels disturbed. But when no other boys are there for a long time, Jagat feels lonely.

Music

Jagat is an exceptionally good tabla players. However he has not been getting time to practice.

Sports

Jagat only gets to play thrice a week and at times only once or twice. His stamina has reduced but he still works hard.

Self Report

I had my 10th board exams in October'17 therefore I was fully focussed in my studies. A teacher came from Lucknow, Meeta ma'am who taught us chemistry for a month and covered our syllabus. She would give us a test after covering each chapter. Most of the time I performed well in the tests. I had covered physics, biology, chemistry, English, Hindi and most parts in maths and social science in Kechla and remaining I covered in Delhi. A teacher from Delhi Annapoorni ma'am taught history for a month to our group. She taught very well by giving good notes and small tests every morning which helped a lot. In between June and July I broke my little finger of my right hand while playing football.

I was admitted to a hospital in Vizianagaram, AP for a week. My finger was operated upon. I missed many classes and my studies. I was not allowed to write for a long time after that. Therefore I would sit in the class helplessly. I felt sad and hopeless when my classmates would write when the teacher dictated notes from the book.

Parthiv bhaiya, son of Bhuvana didi came from America to our school and taught chemistry to our group. We did robotics with Parthiv bhaiya. We made moving human insects and snakes in robotics.

I enjoyed doing robotics with Parthiv bhaiya because I had never done robotics before. In mid august I left for Delhi for my board exams. My main aim in Delhi was to study for my board exams. Since I had covered all the subjects, I had to only clear all the doubts I had and to practice previous year's question papers. I hardly went for games.

My results were as follows: -

English	66
Social Science	75
Hindi	66
Maths	44
Science	43

After my board exams I took PCM as my subjects for 12th. I did not do well in my board exams and my Science and Maths were especially poor, but I still decided to take PCM as subjects because I enjoy studying science.

Sports

I rarely went for my sports. We had a match with The Mother's International School. It was a friendly match. I scored 1 goal and Lalu scored another and we lost the match 3-2. We had a cross country race called Salwan marathon. I participated in this long race. I had not done running for quite a long time.

I was ranked 69 in the under 15 years category. I did not attend the sports day in Kechla because I was in Delhi studying science and math with Prakash bhaiya and Archana didi.
