

Aryan Krisani

DOB-05-Oct-18

Report for 2022-23 (First Term)

Aryan is a cute and affectionate child. He comes to the school regularly. He wears clean clothes. He is very attached to didis. He talks with didis and with children in Hindi, mixed with village language. He goes for lunch holding didi's hand. While going back

home also he needs didi's hand. When he does not get didi's attention he sits quietly in a corner. He has a good appetite. He eats all the food given in the school. Initially he needed help in brushing his teeth but now he does it independently.

Chanting

He sits quietly in the circle at chanting time. He sits with open eyes, without opening his mouth to chant. His participation in singing is also very limited. He only does few actions by observing Didi while others sing. He needs to open up.

Drawing

He always seeks Didi's attention. When he is given a colouring sheet, he tries to finish as quickly as possible to go back to didi. He scribbles with dark colours only. His colours cross the outline. In freehand drawings, he generally draws the pictures of himself, didi and trees. Then he rushes to didi to show and talk about his pictures.

Dance

He loves to dance. He enjoys doing movements of freestyle dance. When English rhymes are played on the speaker, he copies the actions from didi as English comprehension is limited.

Games

His gross motor skills are good. He likes the outdoor activities because he has the

freedom to move around and use his energy. While doing exercises and playing games he follows the instructions and does everything properly. Jumping, running and games are his favourite activities.

Maths

Aryan likes to do maths with objects and he has learnt counting till 10. He needs individual attention in the maths class. He needs to be more focused as when didi asks questions he is unable to answer.

Movies

Again, language is used in movies. So it is difficult for him to sit and watch. So he tries to come out of the hall. When didi makes him sit again, he lies down. He takes less interest in movies, no matter what movies they are. Aryan is one of the youngest child in the group. So, he requires emotional support.
