

# Saiti Krisani

DOB- 6<sup>th</sup> September'17

Attendance- 182 out of 183 days

Report for 2023-24 (First Term)

## Introduction

Saiti is a regular student who arrives at school on time. She enjoys having breakfast at the hostel and playing in the sand pit. Saiti maintains good personal hygiene and can be seen

brushing her teeth at school. Occasionally, she wears dirty clothes and changes into clean ones in the group. She has a healthy appetite and eats all the vegetables and food prepared at the hostel.

## Circle Time

During circle time, Saiti sits with her legs crossed but doesn't close her eyes. She participates in chanting with a loud voice but may face difficulties in

pronouncing some words. She enjoys singing songs with actions, but sometimes, when she's not in the mood, she plays with her clothes and fingers. Learning new songs can also take some time for her.

## Languages

### English

Saiti likes to learn the English language through rhymes. She enjoys listening to short animal stories from picture books, although she may not fully understand them. She can answer questions related to the stories, often trying to respond in English. She has learned some vocabulary from picture books and can introduce herself in full sentences. She has also

learned the names of body parts and the relationships with family members.

### Hindi

In Hindi, Saiti likes to listen to stories from picture books. She comprehends the full story and can answer questions related to it. However, she struggles when it comes to retelling the story and may find it difficult to remember the sequence. In the "Myself" topic, she created a book about herself through drawing and painting but takes a while to think and talk about herself. In the "Body Parts" topic, she learned the names of body parts in Hindi and made drawings and paintings of these parts.

## Mathematics

Saiti enjoys learning in a playful way. She has learned the names of colours by playing with Rangometry, as well as concepts like heavy-light, big-small, long-short, and fat-thin through observing various objects and collecting items from nature. She has started counting by touching different objects and beads. Saiti can count up to 5 by observing a ganit mala, but beyond 5, she relies on touching the objects. She can count numbers till 100 in one go, with some confusion in transitional numbers like 50, 60, and 70.

## Skill work

She likes to colour pictures in art class, paying attention to colouring within the lines and keeping the paper clean. She prefers drawing her family and, despite working slowly, aims to complete her work beautifully. Her favourite colour is red, and she colours her drawings darkly.

## Celebrations

Saiti enjoys dressing up for programs and likes wearing costumes. On July 5<sup>th</sup>, she performed a drama about body parts. On August 15<sup>th</sup>, she danced to the song "Sri Aurobindo Name Ananda." On August 30<sup>th</sup>, she made Rakhi with beads and thread and celebrated Raksha Bandhan at school. On September 7<sup>th</sup>, for Janmashtami, she performed a dance on the song "Adharm Madhuram." On September 19<sup>th</sup>, for Ganesh Puja, she danced to the song "O My Friend Ganesha."

## Games

Saiti is a healthy, energetic, and friendly girl who enjoys all games, exercises, running, and jumping. She remains active and alert during games and plays without complaining. She excels in running and is continually improving. Her

favourite games include "chain game," "musical chair," and "ice and water."
