

Rashmi Mali

DOB-15-Dec-10

Attendance-179 days out of 183 days

Report for 2024-25(firs term)

Introduction

My name is Rashmi Mali, and I am thirteen years old. I enjoy studying at this school very much. I am currently in the 10th class, and my favourite subject is English. My favourite sport is basketball. In my leisure time, I like to solve Sudoku puzzles and read books. I also enjoy participating in all the activities organized by my class. I am regular in my classes and always keep my things clean and organized. I speak politely to everyone, and I love my school very much.

Yogasan

I really enjoy practising yoga. Although many of the asanas are difficult for me, I always try my best.

I mostly do sitting asanas like the rabbit posture, Padmasana, and Paschimottanasana. My favourite posture is the Nataraj posture. I also do stretching in yoga, although I find it challenging and often feel pain afterward. However, I like stretching because it makes my body flexible. Yoga classes start at 6:00 am and end at 6:30 am. I love doing yoga.

Shramdaan

I clean the hostel every day. Among the cleaning tasks, I enjoy cleaning the staircase because it doesn't take long to finish. I rarely clean

the toilets, but I do different tasks regularly. The shramdaan takes place after yoga, and I enjoy doing it to keep our surroundings clean.

Painting

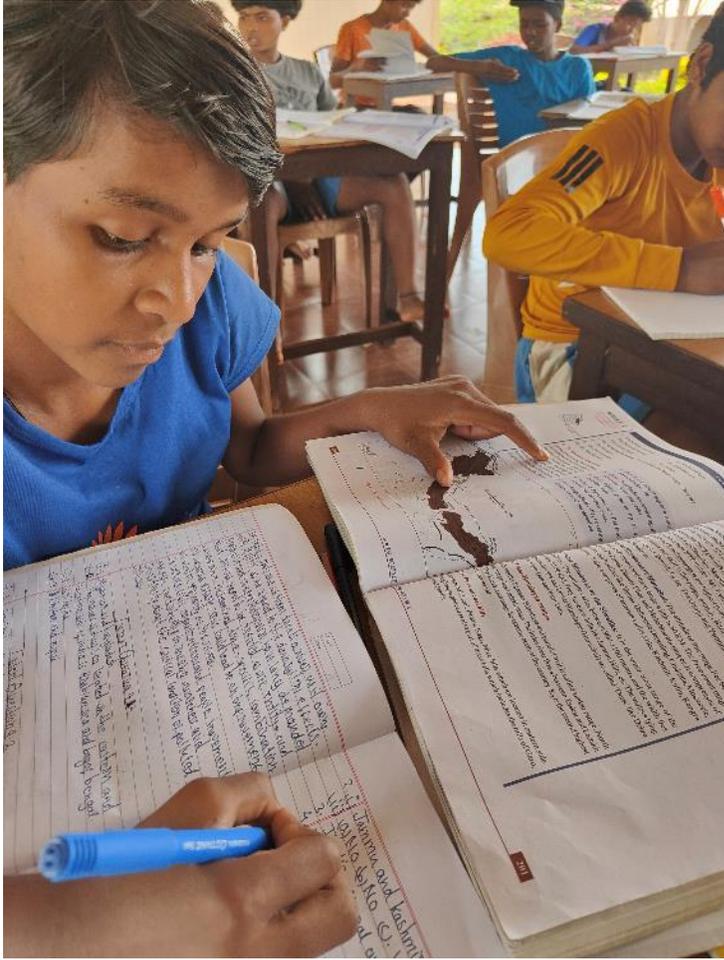

My painting class starts at 8:30 am and finishes at 9:30 am. I am currently using the 10th class book of NIOS for painting. I really enjoy studying painting. Initially, I learnt some techniques, such as drawing objects through observation, painting with watercolours, and creating human figures. Recently, I have started my practical work. I often find it challenging to create exactly what I

envison, but I always try my best. I rarely draw nature and objects, relying mostly on books and my observations. While drawing, I sometimes hesitate because I'm not used to working on large sheets of paper. I have completed the first two chapters of my course book, including their question-and-answer sections. I found the chapter on Arjuna's penance to be difficult, but I understand it much better when didi explains it.

English

I really enjoy my English class. I am currently studying the 10th class book and have started the second book. In the first book, I struggled with some chapters, such as "Shoeshine,"

"Birthday Letters," and a few others. However, I enjoyed and understood stories like "Snake Bite," "Kondiba: A Hero," and "Tiger Comes to Town." I rarely ask questions in class, but I have improved my reading and handwriting. When it comes to explaining questions, stories, or poems, I sometimes find it difficult to explain to others. I recently started the second book and completed the first chapter, which was a poem that I understood only a little. I also study grammar and have learnt about regular and irregular verbs, past participles, and synonyms. I understand most of these concepts well, except for synonyms, which I am still working on. I find it easier to grasp when Didi writes on the board. Although I'm not great at grammar, I always try my best and am improving my skills. We do many activities in English, such as self-reading and group

reading. I also have dictation exercises that I need to improve. I have read several books in a group, including "Young Uncle," and I am currently reading A.P.J. Abdul Kalam's autobiography, which I understand well. I am also improving my speaking skills by conversing with friends and participating in class. In English class, I learnt two songs. Both songs were easy for me to learn, and on the final day, I sang confidently.

Hindi

I enjoy my Hindi class as well. I am currently studying the 10th class book. I found the first chapter easy to understand because it was a story that I loved. However, the second chapter was a poem, which was a bit more challenging for me. After finishing the chapter, I took a test but struggled to answer the

"Consumer Awareness" and "Introduction to Our Resources." I performed well on the tests. However, my spelling in home science needs improvement. When Didi explains things, I always pay attention. I enjoy home science class very much. After finishing both books, I am now doing daily tests on each chapter. Here are some of my test scores:

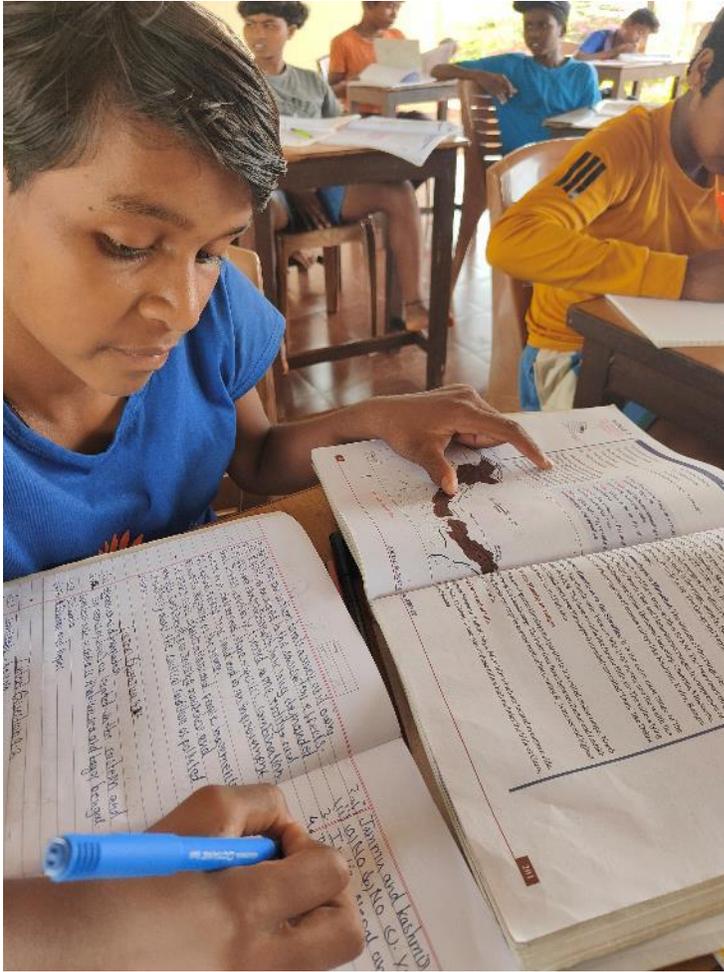

1. What is Home Science - 13 out of 15
2. Food and Nutrition - 13 out of 15
3. Food Groups - 11 out of 15

questions. I did a retest afterward, and by working hard, I achieved good marks on the following chapters. I have completed up to the 10th chapter. I have also learnt some grammar chapters. While I enjoy studying grammar, some chapters are a bit difficult for me to understand. I regularly get my notebook checked. Once a week, I do self-reading, and I love reading stories and taking dictation, though I need to improve my spelling and handwriting.

Home Science

I enjoy my home science class very much. I am currently studying the 10th class book and have completed the course. Some chapters I found difficult include preservation of food, care and maintenance of fabrics, and communicable diseases. I didn't ask any questions about these chapters, but I wrote notes for each chapter. I like writing notes because they help me answer questions easily. However, I struggle to write answers on my own. When I review the book, I can answer questions effectively. In the second book, I found some chapters confusing, such as

4. Food Preservation - 4.5 out of 20

5. Environment - 14 out of 25

I also solve previous years' question papers for revision.

Social Science

I am studying the NIOS Class 10 book. In history, I am studying the 5th chapter and have completed some chapters in geography as well. Most history chapters are not too difficult for me, although the first, second, and part of the third chapters are challenging. I make notes for these chapters. I understand concepts better when Didi explains them on the board, but I struggle when she only reads from the book. I rarely ask questions in class. My performance on tests has been average. Sometimes we watch historical videos, which help my

understanding. In geography, we are close to finishing the chapters, with only two or three left. I find geography easier to understand than history. Didi occasionally assigns extra chapters, and I grasp concepts easily when she explains them on the blackboard. I always pay attention in class, although sometimes I feel bored and sleepy. I read "Amar Chitra Katha" and do self-reading from our textbook. I complete all assigned homework. I love social science class very much.

Gardening

I enjoy gardening a lot. Every Wednesday at 2:30 pm, I participate in gardening activities. I mainly water the plants and remove weeds. I am always present for gardening sessions. I don't enjoy gardening when it rains, but I love it otherwise.

Dance

I like my dance class very much. Suparna Didi teaches our group, and we learnt a dance for Ganesh Chaturthi. I always pay attention during class and can learn new steps easily and quickly. I would love to learn more dances.

Art

I enjoy my art class very much. My art class is on Fridays at 2:30 pm. I have learnt techniques like paper folding and drawing with soft pastels. I particularly enjoy drawing nature and objects using oil pastels and coloured pencils. I recently drew a picture of a girl named Ramta on a large sheet of paper. In class, I have also read some theory from the textbook and completed several chapters.

Computer

I like my computer class very much. My computer class is on Mondays from 2:30 to 3:30 pm. My typing speed is currently slow, and I need to improve it. I am studying the course book for the 5th grade. I always pay attention during class and arrive on time.

Games

I love playing games, and my favourite sport is basketball. I play games every day and do exercises, including running. We play various games like football, basketball, volleyball, and others. Basketball and football are my favourites. I always arrive on time and pay attention while exercising or playing. I am always present during games.

Celebration

On July 5th, I participated in the drama "Listen to the Mountain," where I played the role of a village man. I remembered my lines well, and the performance was excellent. Before August 15th, I participated in several activities, including a quiz, essay writing, and painting. I won second prize in the quiz. On August 15th, I sang two songs: "Namaste Sada Vatsale Matrabhoomi" and "Jai Tu Janani." I enjoyed singing these songs and quickly memorized the lyrics. On the final day, I sang confidently without getting nervous. During Raksha Bandhan, I tied a rakhi to Vaidehi, and I enjoyed the celebration. On Ganesh Chaturthi, I performed Pushpanjali and worshipped, followed by a dance. I enjoyed the

celebrations very much.

Satsang

I enjoy satsang very much. I always arrive on time and pay attention during this time. I sit erect and concentrate. I enjoy singing songs and listening to others sing.
