
Sanvee Rautray

Date of Birth- 25th July 2014

April 2018-March 2019

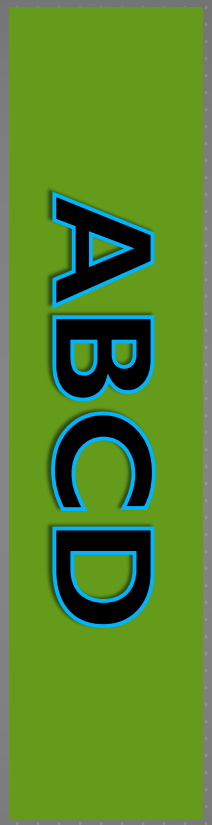
- Sanvee has attended school for only

238 days during the year. As she has not attended school for 127 days, she finds it difficult to learn at the same pace as the other children. She always keeps herself neat and clean. She has learnt how to use toilet and clean herself. Initially when she started coming to school, she did not eat the vegetables and wasted a lot of food. But now she does not waste food but she still doesn’t eat some of the vegetables. She always wants to sit near didi.

- ***Circle time***:
- In circle time, she sits nicely. She chants loudly but some pronunciations are incorrect. When didi corrects her pronunciation, she catches it. But after sometime she forgets again. She likes to sing “chhoti si munni”. She can’t sing a song confidently by herself yet.

- ***Maths:***
- She does not come to school everyday. Therefore she learnt slowly and needs more time to understand. She has learnt names of colours. She can identify big and small, fat and thin, heavy and light. She cannot arrange the objects in the order of size yet. She likes to play with blocks. She can count from 1 to 10. She has learnt some counting songs. She just remembers the numbers but she does not understand the counting. She is not able to associate the quantity and the numbers.

- ***Language:***
- ***Hindi:***
- She does not pay attention to the stories but focuses on how didi tells a story and her actions. She can’t give answers when didi asks. When she is asked to tell a story, she holds a storybook and makes up a story and tells it like didi. She narrates about herself like when she comes to school and what does she did in the school. When she tells any story, she mixes Oriya words. Her pronunciation is not clear in Hindi.



English:

Sanvee tries her best to pick up the language. She is good at doing action and loves to do role-play in the group. Sometimes she is shy in front of the audience. Because of her frequent absence from the school, she is way behind. She takes time to remember the rhymes taught in the group. She is very articulate. She can remember the naming words but sometimes finds it difficult to pronounce a few sounds like z, sh, wa, etc. She enjoys storytelling but seems lost sometimes.

- ***Skill development:***
- Her fine motor skills are not developed. So, she is unable to do some of the activities well. While colouring she uses only one colour. She draws only flowers, butterflies and clouds. When she tears papers, she makes big pieces. She likes to do painting. She does clay modelling.

- ***Games:***
- She likes to play in the sandpit with her friend Kirti. When we play the games like ‘hide and seek’ or chain game, she knowingly gets out first. beacuse she wants to be den. Her health is good.

- ***Celebrations:***
- She is unable to dance well but tries to do her best. When they did the play, she forgot her dialogues in front of the audience.
