

## My personal report by Jagat Nag

2021-22

DOB- 17<sup>th</sup> November'02

### Academics

I have just appeared for my 1<sup>st</sup> year B.Sc. I gave eight papers. My geography papers went very well. I had studied geography from Subhakanta sir. I attended his class twice a week, on Sundays and Saturdays. My exam centre was in Koraput.

### Volunteering

I am currently helping with four classes. Two maths classes with Progress group, science with Progress in the morning and English class with Joy group in the afternoon.

### Shramdan

I go for Shramdan every morning. Not only do I do my work offering, but also encourage and oversee the younger students.

### Music

I play the tabla and also teach and encourage the younger children to play. Whenever tabla has to be performed during a performance,

and it is a difficult piece, I play myself. I also enjoy singing.

## Sports

I have a passion for football. I am told that I play quite well, shoot accurately hard and dribble very fast. I also play quite a bit of basketball and volleyball. I can swim long distances and am also good at running- both long distance and sprints. I can cycle and ride the unicycle very well.

## Celebrations

On The Mother's birthday, some older students of faith group and I had put up a play based on Sri Aurobindo's epic-Savitri. I had taken the role of a God. The play went very well. On sports day I helped in setting up the tents and

arranging things on the field. There were activities done by the children like jumping, running and fun games. I was in the jumping section with Mani Didi, Suparna Didi and Srinath bhaiya. I was noting down the measurements. The children had a football match

on that day, and I was the referee. On New Year, the school had gone for a picnic, but some children and I were studying in the school for our exams which were to be held in February. But we went to the picnic spot to have our lunch.

However, the exams were postponed to March. The exams were held in the same centre in Koraput. I have given seven papers this time. Two geography papers, Physics and maths which I had not cleared in the last exams, school psychology and reading and writing skills. The maths paper did not go well as I was not prepared. The other papers were better.
