

Ajay Krisani

DOB-15-Dec-10

Attendance-180 days out of 183 days

Report for 2024-25(first term)

Introduction

My name is Ajay Krisani, a 13-year-old student of Auro-Vidya Mandir. My hobbies include reading novels and comics, and playing football. I enjoy studying in this school because I have my friends by my side, and I regularly attend school.

Yogasana

In the morning at 6:00 a.m., I start doing yogasana. I have learnt many types of asanas, but I find some difficult to do, such as halasana, paschimautasana, etc. However, I always try hard to do each asana perfectly. I finish my yogasana at 6:30 a.m.; after that, I feel relaxed and go to do shramdan. I attend yogasana regularly.

Shramdan

I do different types of shramdan, such as toilet cleaning, hostel cleaning, gardening, school cleaning, kitchen work, and cleaning the girls' hostel. In the kitchen, I help make breakfast, and my shramdan team helps cut the vegetables. In the girls' hostel, I clean the garden by removing the weeds, watering the plants, and sometimes putting manure. In toilet cleaning, I clean all the toilets and bathrooms; in the boys' hostel, I sweep all the verandas. In gardening, I remove weeds and water the plants. For school cleaning, I sweep the corners of the school and the tiles, and I also clean my group area.

Painting

I have painting classes twice a week: once at 8:30 a.m. and once on Saturdays at 2:30 p.m. I have started the NIOS painting book and understood the first two chapters; I also completed the question and answers. I am drawing on white chart paper for the practicals, and I am very enthusiastic about it. I make human figures, animals, objects, etc. It was fun, but I used to find drawing human figures difficult because I am not good at drawing the eyes, lips, and ears perfectly, but I strive to improve. I find it easier to draw objects because I have been drawing them since childhood. Now I have almost finished the practicals. Sometimes I work on drawings, and sometimes I focus on my textbook. At 2:30 p.m., I have another painting class. In this class, I learn paper folding and how to use soft pastels to make drawings. I enjoy these classes; they are fun, and I have improved my ability to draw human eyes.

English

I love studying English because it is the easiest subject for me to understand. I have started the first book of NIOS and finished it. I liked the first chapter because the old man was very cunning, and Raja's grandfather was caring towards his grandson. However, I find the poems difficult because the writers use words that I don't relate to. Now I have started the second book

of NIOS English, with the first chapter titled 'My Only Cry'. To improve our handwriting, we copy long stories from the NIOS book. To improve my spelling, I take dictations of words and passages. In group reading, we have completed 'Young Uncle in the Himalayas' and have now taken up 'Wings on Fire' by Dr. Kalam. I read novels and enjoy them; I imagine the scenes as movies, which keeps me engaged. I have completed all the series of Harry Potter and The Young Samurai. I also learn and practise songs and plays for school programmes. For Independence

Day, we learnt two Sanskrit patriotic songs, 'Jayatu Janani' and 'Namaste Sada Vatsale Matrubhume'. The pronunciations were quite challenging, but I managed. For the school's birthday, I participated in a play called 'Listen to the Mountain'. At the end of the class, we play a vocabulary game for ten minutes. Our teacher says an alphabet, and we all take turns saying words that start with it without repeating. It is very interesting.

Hindi

I am working on the first book of NIOS, preparing for the 10th exams. I have covered up to the 10th chapter. I liked the first chapter, 'Bahadur'; it was an interesting chapter about a little boy. However, I find some chapters a bit difficult to understand because I am not very attentive in class and sometimes feel sleepy. When I struggle to understand, I ask for explanations and try to grasp the concepts. After each chapter, I solve the questions, but I need to work hard on my spelling.

After completing a chapter, I take a small test to answer the questions, but my marks are often deducted for spelling mistakes, resulting in lower scores. Once a week, I do free reading, where I love to read stories and try to understand them. I have also completed some chapters in grammar, such as sandhi and samas. Sandhi was a challenging chapter, but now I am clear on it.

Home Science

I have home science classes from 11:30 a.m. to 12:30 p.m. I have finished both textbooks of NIOS. I hadn't completely finished the first book, which is why I found it difficult to take daily chapter tests. However, when I do take the tests, I perform well because the chapters are familiar, covering food, the environment, and clothes. I find the second book easy to remember because the chapters relate to daily life and the beginning of human life. In class, my teacher gives me question papers to solve. I solve them daily and revise for tests, and the next day I check my answers and take tests on the first book. I performed well in all the chapters I studied:

1. Home Science - 13 out of 15,
2. Food and Its Nutrients - 18 out of 25,
3. Food Groups - 15 out of 15,

4. Methods of Cooking Food - 17 out of 20,
5. Preservation of Food - 12.5 out of 20,
6. Environment - 20.5 out of 27. I enjoy the classes and love studying home science because I find the chapters easy to understand.

Social Science

I have almost finished the history section, with only two chapters left. To understand the chapters, I always write notes, and after finishing, I do the terminal questions and go for feedback. I have finished the geography section. To understand and remember the chapters, we create charts and write notes.

I have now started the second NIOS book, focusing on civics. I have started the first chapter, and to remember the concepts, I have written notes. I always participate in class, and if I come across a word I don't understand, I ask for clarification. I try my best to concentrate fully in class, although I sometimes get distracted. Nonetheless, I enjoy the classes.

Dance

I have dance classes on Fridays at 2:30 p.m. I always learn dances in formation. When the school's birthday approached, I was learning a dance for Hanuman Chalisa, but I didn't learn all the steps in time for the performance. For Ganesha Chaturthi, I learnt a dance. I found it challenging to learn the steps, but it was interesting and enjoyable.

Gardening

I do gardening on Wednesdays at 2:30 p.m. I remove weeds, water the plants, and pick up plastic from the garden. I finish this class at 3:30 p.m. in time for my games.

Computer

I have computer class on Mondays at 2:30 p.m. I have learnt how to add different colours and mix them to create new colours in Paint 3D. I also work on painting and typing. In typing, my gross speed is below 24 words per minute because I still struggle with locating the letter keys. However, I enjoy it and am trying to improve my speed.

Games

In the

evening at 4:00 p.m., I go to the field for running and exercises, and then I play games such as football, basketball, and volleyball. I prefer playing basketball over volleyball, but I love playing football the most. In basketball, I practise shooting, dribbling, and lay-ups. I have improved my shooting from long distances, including three-pointers. In

volleyball, I have improved my ball-hitting skills. In football, I mostly play as a defender, which I enjoy. I am part of a games team called Hydrogen, and I play all the games with this team every day. I finish my games at 5:30 p.m. and go to my hostel to take a bath.

Satsang

After my bath, I go to participate in satsang in the meditation hall. I start at 6:15 p.m. and finish at 7.
