

# CHIRAG GOUDA

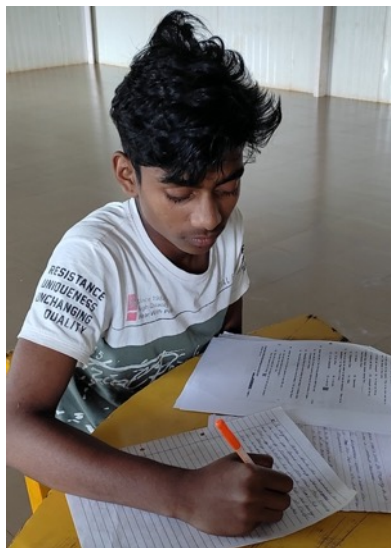

2021-22

DOB- 8<sup>th</sup> January'07

My name is Chirag Gouda. I am fifteen years old. I have completed my matriculation last year in October 2021. I performed my best during my exams. I had practised a lot for my upcoming exams. Now that I have got my result after giving exams, I am trying to study for my 12<sup>th</sup>. Sometimes I would attend class with Abhay, Bhagwan, Surya

and Kumari, but I was not able to catch up with them as I had joined them after they had completed half of their syllabus.

## Academics

I was preparing for my tenth and now that I have completed my exams and got the results. I have taken up science for my further studies. I study physics, chemistry, and biology. I

attended the online classes and also study on my own. I am finding these subjects interesting to study as they are new for me, and I am getting to learn many new things. Sometimes when I am unable to understand the topic, I take the help of Abhay or Bhagwan to clear the concept. The subject which I like the most is biology because I like to study about the plants and animals.

## Celebrations

As I was preparing for my tenth, I neither attended nor participated in any programmes. After completing my exams, I

attended some programmes like Christmas and New Year celebrations. I enjoyed the New Year's programmes as all the children from my group had participated in it.

## Shramdaan

During my exams I was not going for shramdaan as we would study mathematics with Srinath bhaiya in the mornings. After completing the exams, we restarted our shramdaan, just like the other children. Of all the shramdaan which we did, I enjoyed working in the kitchen the most as we only had to cut vegetables.

## Games

During games, I enjoy playing football as I am very good at it. I was good at shooting baskets but I did not enjoy playing basketball. I am also good at volleyball.
