

PRABHAT KRISANI

DOB-10-May-09

Attendance-182 days out of 183 days

Report for 2024-25(first term)

Introduction

I am Prabhat Krisani, a 15-year-old born on May 10, 2009. I enjoy spending time with my family and do not take many holidays. I have completed exams in four subjects: in Social Science, I obtained 69%; in Science, I obtained 79%; in Maths, I obtained 81%; and in English, I obtained 79%. I cleared all four exams of the NIOS board and am currently revising for my 10th class Hindi examination, which I will be sitting for in October. I enjoy studying this

subject. I am part of the Gratitude group and take great care to stay clean. I live in the hostel and am content with the food provided. I also enjoy my time with my friends.

Shramdan

I do Shramdan early in the morning at 6:30. My tasks include cleaning toilets, hostel cleaning, gardening, school cleaning, cleaning the garden of the girls' hostel, and the kitchen. For toilet cleaning, I clean the toilets and bathrooms, wash the wash basins, clean the walls, and maintain the open drains. In hostel cleaning, I sweep and mop the dining hall and dining tables, remove cobwebs from the walls, wipe the tiles, and clean the open drains. We also sweep

the veranda and the roads. In gardening, I water the plants and dig the soil. I also remove weeds in the school and hostel

gardens and cut grass for the cows. For school cleaning, I sweep the paths and veranda and clean the grounds. In the kitchen, I cut vegetables for breakfast, fill the water filter, and wash the utensils.

Hindi

As I have only one subject to appear for in October (Hindi), I study for 2-3 hours daily. I go through the stories and poems in the book, revise the questions and answers, and solve previous years' question papers. I also revise grammar

topics, such as suffixes and prefixes, as well as compound words and joining. In the joining section, I solve many questions. I practise writing both formal and informal letters and work on essay writing. I also take tests for each chapter.

Physics

I have also started studying 11th class Physics. I study from the NCERT book and have almost completed half of it with Prakash Bhaiya. I understand the theory quite well, but some of the numericals are difficult.

Therefore, I practise a lot of numericals from the NCERT reference book. I find it easier to

grasp the concepts and solve many questions from the NCERT book. If I encounter difficulties, I ask Bhaiya for help.

Sports

I enjoy playing games, especially football. I run on the roads and hills and take rounds in the field. I do exercises such as joint exercises, running, sit-ups, windmills, pull-ups, and hanging from the bar. I play games like football, basketball, and volleyball. In

football, I sometimes play as a defender, midfielder, or score goals. I have improved my skills while playing football. I also practise basketball, focusing on dribbling, shooting, and passing. In volleyball, I like to be

a net keeper. Previously, I struggled to hit the ball properly, but now I can hit it well, and fewer balls go out of play.

Festivals
