

Pratik Gouda

2019-20

Pratik is one of the few children that take holidays. But this year his attendance was better. As he has missed so much in the past, it is a struggle to cover up. He therefore does not always concentrate in class. Pratik became more receptive towards his work. He is a good listener. He loves to spend time with his friends and feels lonely when he is alone. Pratik takes part in chanting but chants only those shlokas, which he knows. In the assembly he sits quietly and sings only those songs, which he knows.

Languages

Hindi: Pratik's Hindi spellings are improving. But sometimes he makes mistakes. His reading is very slow. After reading the story he tries to explain his story. Sometimes he does not complete his work. But with the help of didis he makes an effort to complete it. He can memorise short dialogues but during the performance he gets nervous and forgets his dialogues.

English- Pratik can read small story with easy English words. He loves to read big letters stories. He can not pronounce some big and difficult words. Had difficulty in making

spellings and sentences. Some times he ask for help and sometimes he come his own and sits near didi during the story reading.

Odia- If Pratik will be conscious during class time then he can be a good learner. He has grogress slowly in oriya.

Maths- Pratik has improved in his maths and he is also good in maths. He is good in doing the sums of multiplication, he is good and has confidence in doing addition and subtraction and carrying the numbers. He doesn't know the multiplication table and he can't tell the tables but still he is able to do the sums. Now he's doing the practice book -2. Mostly he sits quietly and does his maths but sometimes he is lost in his thoughts and he'll forget about doing math. He finds a little difficult to do the word problems. He needs an elder to explain. In fraction, he knows the basic things like numerator, denominator, like and unit fraction. Also can draw the figure.

Project

We did first aid project where Pratik fully involved himself and leant the value of first-aid. He could relate to himself and gave some examples related to his friends and family.

Then we worked on Seasons where Pratik learnt the names of seasons and seasonal fruits. He took a long time to understand why seasons change in a year. He also learnt about earth and how its move. Through this he also learnt about weather and atmosphere.

Myself- This project was helpful for Pratik as he learnt to think about himself in deeper way. He also built up his speaking and listing skills. Before this project Pratik would mostly sit quietly and sometimes would not participate in discussions and would not give his opinion.

Sports- He enjoys and learns properly.

Celebrations

He has participated in many programmes. He had learnt to do dramas. He took a long time in learning his dialogues and actions. He performed nicely on the final days but he could do better if he put more effort in learning.

Art- He learnt to make different types of flowers, rabbit, jumping frog and square with paper folding. He also learnt to make rakhi and cards.

We have an aspiration for Pratik that he must come to school regularly and put an effort in learning.
