

Khagendra Muduli

Date of Birth – April 12, 2008

Report for 2022-23 (first term)

Introduction

My name is Khagendra and I am a student of class 10 in Auro-Mira Vidya Mandir in Kechla, Odisha. I like to do self-study in the library. I also love the company of my friends. I have learnt to share my things with everyone. I love to stay in the hostel because I can take part in many activities in the hostel which I enjoy.

Social Sciences

In the Social Science class, we have completed Civics and Geography and also taken a test of these chapters. Sudeep Bhaiya, who had come to visit Kechla from Assam,

taught us Geography and some chapters of History. He asked us to attempt the questions and answers of all the chapters that he had done with us in Geography and History. He also did some extra questions and activities of these chapters. Sudeep bhaiya also showed us some videos about forests and mountains. In the tests that I gave; my result was mixed. I passed in some chapters and could not pass in others. I found some chapters of Civics quite difficult.

English

There are two textbooks of English in the syllabus of National Institute of Open schooling (NIOS) and I have completed the first book and started the second. We have started revising Book 1 and my teacher has given me tests from some of the chapters. I am not scoring very well in these tests and I have promised myself that I will definitely work hard to improve myself and get good marks. My handwriting is also improving and so is my reading ability. For free

reading, I get books like Ben Hur, Moby Dick, The Invisible Man

etc. issued from the library. We have learnt letter writing, message writing and notice writing in writing skills. We have written essays on trees, birds, nature etc. and learnt active and passive voice and direct and indirect speech in Grammar.

Home Science

Khagendra is a quiet child who rarely speaks in the class. He never asks doubts or questions. Though he is hesitant in speaking but he has a sharp mind and has good

memorizing capability. He remembers the definitions and the concepts very easily. But he needs to open up and speak in the class. He is able to attempt the exercises given at the end of the

chapters by himself without taking much help from the didis. In the tests, he did his best but he needs to improve and study hard. He enjoys doing the practical. Some of the chapters which were difficult for him

to understand were: “Ethics in Daily Life” and “My Family and I”.

Hindi

I am doing the syllabus of Class 10 of NIOS. We have completed both the first and second books. Now we are revising both the books. I love to read stories in free reading. In dictations, most of my spellings are wrong and so I need to learn the spellings of difficult words thoroughly. In grammar, our teacher taught letter writing, message writing, paragraph writing and essay writing and many other concepts of grammar. We have written essays on trees, rain, sun, etc.

Data Entry

I am doing the syllabus of Class 10 of NIOS. I like this class because we do many practical classes on the computer. In the tests I am scoring full marks most of the time. But I still need to improve in this subject. I find some chapters in Data Entry difficult. The difficult chapters were basics of word sheet and basics of computer.

Sports

We play Basketball, football, volleyball and do exercises and running as warm up. My favourite game is football. I love to kick the football here and there and so I love to play this game. In basketball, I like to take shots at the Basket and take rebounds.

Shramdan

We do Shramdan after doing self-study. We take part in many activities like gardening, hostel cleaning, school cleaning, kitchen

work, etc. I love doing kitchen work, cleaning the school and sometimes gardening. In gardening, we take out weeds from the grass and mow it. In the kitchen, we cut vegetables for breakfast and lunch.

Celebrations

On August 15, I participated in a play on Sri Aurobindo and I got the role of a British policeman. On the day of Ganesh Puja, I narrated a story about Ganesh Ji's snacks and I was very nervous about facing so many people and speaking before them. From August 6 to August 12, we also had quiz, painting, poem - writing

competitions. I had participated in the painting competition and quiz. I also spoke on Sri Aurobindo, though the attempt was not really up to the

mark. In the play, "OUCH", I got the role of a commander and I loved doing it. On Teachers' Day, the teachers entertained us by performing a dance which we all enjoyed.
