

Bhagwan Jani

DOB-13-Jul-06

Report for 2022-23

Introduction

My name is Bhagwan Jani. I am 16 years old. I am studying in 12th class from National Institute of Open Schooling (NIOS). I have taken English, Chemistry, Physics, Mathematics and Physical education as my subjects.

Chemistry

I like to study chemistry. I have online classes with Nidhi didi. She explains and makes me and my mates understand the chapters properly. She also gives questions to solve and we write the answers and tell her the answers. We ask

her whenever we have a doubt or we are unable to find the answer of some questions. This time when Meeta didi had come, she made us practise previous year question papers. She also taught us some new chapters and clarified our doubts from other chapters. I used to ask the questions that I was not able to solve to Meeta di. She checked our papers and told the correct answers for the wrong ones.

Physics

I like to study Physics. I study physics, online with Prakash bhaiya. Bhaiya explains me and my mates the chapters, makes us solve the questions of each chapter and clarifies our doubts when we ask. Bhaiya makes us solve numerical based questions on that chapter and he also solves the numericals that we are unable to solve.

Mathematics

I enjoy studying Mathematics. I have completed the first book of the syllabus and now I am doing the second book. I study with Srinath bhaiya. After Bhaiya explains and makes me understand the chapters, I start the exercise of that chapter. I ask the questions to Bhaiya whenever I'm unable to solve any question. He makes me understand the questions so that I can solve them myself or sometimes he also solves the question and explains it to me. In June, Neha didi from Delhi had come to Kechla. We studied with her- Vectors, Plane, Straight-lines, Limit and Continuity and Differentiation. I enjoyed studying with her.

Physical Education

I love to study physical education and yoga. I study this from the book on my own and am able to understand. First, I read and understand one chapter then I do the exercises of that chapter. I can solve the questions easily. I am also solving previous year question papers of Physical education and yoga and I am able to solve them quite easily. I have almost completed all the chapters of the syllabus, only 2 chapters are left. From this subject I learnt names of yogasanas and how to do them. I learnt about sports and about health of our body. I like to study about the asanas and their benefit to our body. I like to solve terminal and intext questions of the chapters.

English

I loved studying English. I studied English on my own and I have already given the exam of English in April. I would first read and understand the chapters and after completing one chapter I would solve the question answers. I enjoyed reading the poems and the stories of my English book. I practised Grammar, letter writing, notice writing, paragraph writing etc. I enjoyed practising them very much.

Shramdaan

I do shramdaan with my group every morning for one hour. I like to do shramdaan. In shramdaan I go to the kitchen, do toilet cleaning, hostel cleaning, gardening and school cleaning.

Kitchen

In the kitchen I help in cutting vegetables for breakfast with my group. I like to cut vegetables with my group in my turn. On some days I also go to the girls' hostel with some of the children to pump water into buckets and bring them to the kitchen to fill the filters.

Toilet cleaning

In toilet cleaning, I clean the toilets, basins and the drain. I like to clean the toilets, basins, and drain. I also pour liquid soap in bottles and dilute it with water for washing utensils. I like to make the liquid soap with my group.

Hostel cleaning

In hostel cleaning, I clean the hostel with my group. I like to clean the hostel building and the campus. I take out the spider webs of the hostel and sweep the veranda of the building and sweep the path inside the hostel with my group. I also clean the open drain of the hostel and the dining area with my group children.

Gardening

In gardening I take out weeds from the hostel and school fields, dig the field and prepare the field for plantation of vegetables with my group. I like to dig the soil of the field and take out the weeds with my group.

School cleaning

In school cleaning I clean the school campus. We sweep the paths inside the school and clean the classrooms. I like to clean my classroom and sweep the school paths.

Games

I play football, basketball and volleyball with my group. I like to play football the most. Before we start the games all the children gather together, concentrate for a minute then do joint exercises and running for half an hour. I like to do exercises and running.

Football

I like to play football very much as it is my favourite game. I like to score goals and I like to kick the ball when it is a corner. I like to play forward but mostly I play at the defending position.

Basketball

I like to play basketball, but less when compared to other games. I like to practise shooting in the court with my team.

Volleyball

I like to play volleyball and I like to hit the ball with my hand. Sometimes I get bored when the ball comes to me very rarely. But I enjoy playing when my team plays well and wins the game.
