Brishti Krisani

Date of Birth- 24th December 2005

April 2018 –March 2019

❑ Science:-

This year I studied 8th class of living science with Veerinder didi. She came to Kechla for a month to teach us Biology. In this book we studied about- crop production, microorganisms, conservation of forest and wildlife, cellular level of organization, reproduction, sound, pollution of air and water.

I learnt more and understood more but we did not speak a lot. I like science because there are activities and experiments to be done.

In some chapters we did experiments like can sound travel through solid, liquid and gas and in which state sound travels fast.

❑ Computer:-

In computer class I do what our computer teacher teaches me. I get happy when it is our computer day but my typing speed is slow.

That's why I practice typing to increase my speed.

We made clock and some things in notepad.

❑ Social Science:-

I am doing class 8th book. I have completed civics with bhaiya and have done all the exercises and have also given tests. Now I am doing history.

In history I am learning 15th chapter and now I have to give the tests.

In history I like to study with Pranjal bhaiya because when he teaches he gives a lot of examples which are not in our book and I like to listen and when I read history it is a story for me.

❑ Hindi:-

I completed 7th Basant book and I have done all the exercises and I am doing 7th class grammar.

I have covered all the chapters like idioms and proverbs, oral expression, paragraph writing, letter writing, essay writing and diary writing. I like to read horrible and happy ending stories.

Mostly I like to read stories from China and Japan and stories of ancient India. We are reading badhte kadam in group. On Mondays when we have free reading, then I read a thick book of folk tales of India.

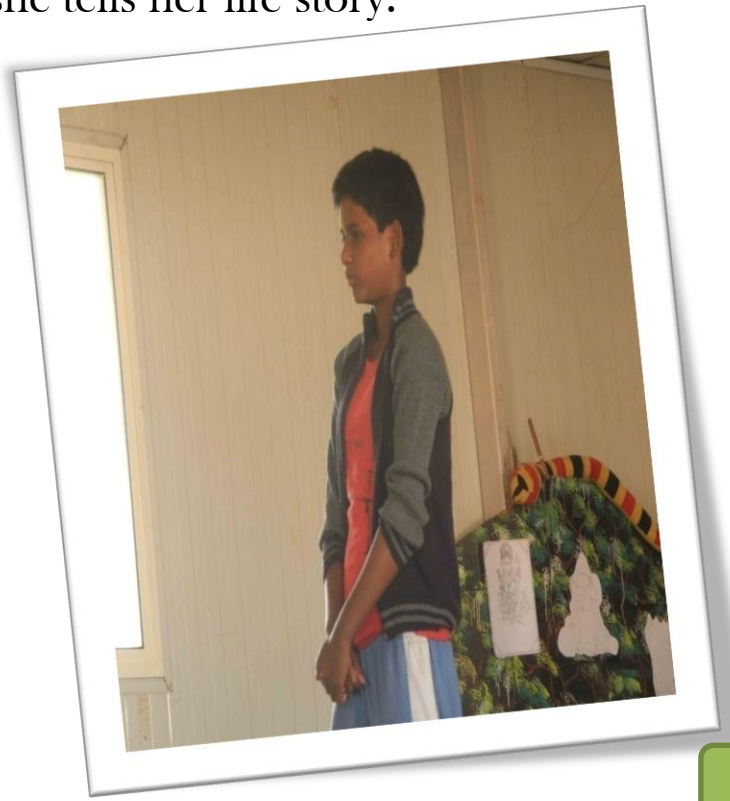
The book contains many stories of different states. In class we do paragraph writing and sometimes didi reads a paragraph and then asks us to write about the topic.

Sometimes when we have group reading, there are some children who read slow, so I feel sleepy and that day I feel bored in class. But our didi teaches us very nicely and she makes fun and laughs with us and sometimes to make us understand she tells her life story.

And from Hindi dictionary we write words and its meanings and we memories them.

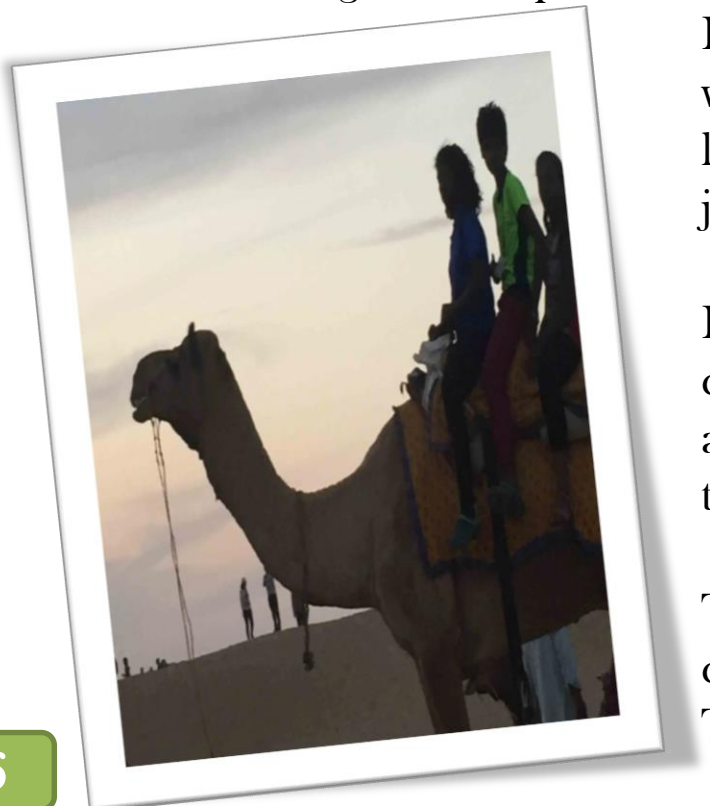
We do dialogue writing, which I like. I have to be careful of spelling mistakes.

I have to increase my writing speed but when I write fast, I write in small letters and it looks very congested.



❑ Trip To Rajasthan:-

On the trip I saw many monuments and forts on the hills. I wonder how they made them, but it was wonderful. The museums were good in which the old things were kept.



It was very hot and I drank 6 liters of water per day. We visited many places like Gulabpura, Falna, Jaisalmer, Jaipur, jodhpur, etc.

I liked Chittorgarh the best because I came to see the Hyundai workshop and in Gulabpura I saw the Mayur textile factory.

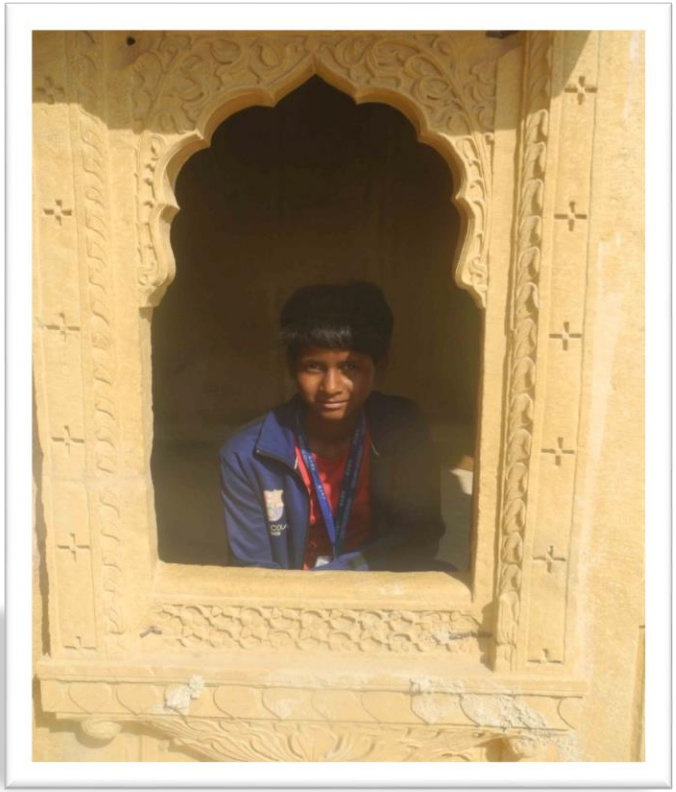
The rooms in Gulabpura were very comfortable.Wach room had its own TV and sofa sets.

I liked travelling by buses and trains. We walked in most places. I got to see the desert and sand dunes without trees.

I liked the carvings on the walls.

There were beautiful gardens.

I liked playing in the sand and riding on the camels with my friends.



Games:-

Basketball is my favorite game. When we practice layups all my ball goes inside the net but while playing I have never tried.

I am very scared while taking layup but nowadays I am going to practice layup because I have to go in January for the basketball match. Sometimes I tries to shoot but many time I miss then I get upset.

But I am trying my best to play well for the basketball match. Before playing games I always do some exercises everyday. I like to see football and also like to play but I get scared because older children come to play with us and they wear studs.

I get scared that if they will step on my feet I might get hurt. But nothing happens.

❑ Yoga...!

In yogasana sometime I don't do some asanas as I feel lazy. Everyday we do some warm up. When didi comes she does different warm up, which I enjoy.

Didi taught us different types of s uryanamaskar and Dhanurasan.

Nowadays I like doing yogasan.

❑ Math:-

In maths I have to work hard and I am slowly. When I don't understand, I ask my teacher and I do calculations wrong.

Sometimes I get irritated and sometimes I get happy.

I am going to complete my 7th class book. I like to do math but I get irritated remembering formulas.

❑ Celebrations:-

there are many festivals celebrated here. We perform many dances in the celebrations. I also enjoy dancing. I like to do freestyle dance.

Report written by teachers...!

Brishti is now a 13 years old girl who is becoming more and more responsible in her work as well as studies. She does her duties on time and maintains cleanliness.

She is a very calm and gentle girl. She does her work sincerely, whatever work she gets.

She remains in a happy mood and sometimes seems to be humorous. Her academics are satisfactory. In a few subjects she is fine but in others she needs to work hard.

Now she has to be more focused while studying and practice writing a lot.

❑ Mathematics..!

She has overcome her mood swings. She is doing book 7 and has reached unitary method. Her understanding has to improve because she is going to face more difficult chapters.

She faces difficulties in word problems. But has a good understanding in short questions. Sometimes her calculation errors makes her slower in maths.

When she makes silly mistakes, she smiles and quickly takes her notebook for correction. She has stopped doing her Shramdan and spends more time in maths.

❑ Dance, Art, Music...!

She likes art class a lot and obeys everything whatever the teacher says. Though she doesn't like to do still life drawings, still she does it.

She does all the drawings with patience.

Once she said "I like to draw Dora and her friend- a monkey.

I like to copy those pictures and colour them. I like to shade with colour pencil and I want to learn how to shade with pencil and paint".

In music she is continuing with flute. Her confidence level is increasing. She has improved her blowing. And she has learnt some Raagas and songs.

Whenever she plays solo and makes a small mistake, she quickly loses confidence and stops playing. For this she needs a lot more confidence.

In the month of September she attended music workshop where she has learnt new things in flute and is continuing the practice. She joined the orchestra too.

❑ Celebrations

On 5th July, for our school's birthday she participated in a drama in Hindi "Devta". She was the narrator of the play.

In the beginning she had the clarity in each word of her dialogue but she was not able to speak with proper pause or punctuation.

She practiced a lot, to be more expressive and narrate the story.

On Janmashtami she played flute with the group and also sang Krishna bhajan.

❑ Social Science.

She is more interested in history and geography. She likes to study geographical features of India and the Indian past.

She loves studying Nagara and Dravidian style of architecture and their builders. She gets good marks in history and she tries to remember.

She is not able to write correct answers of civics and needs more help. She has completed 7th book and has started 8th book.

❑ Science.

She wanted to know “what is light, by what light is made?” She is sensitive and struggles with herself if she cannot understand what is asked of her.

She is trying to pay due attention and improve her writing skills. She needs to develop her concentration skills.

She learnt about sources of light, optical media, how shadow is formed, work of telescope, microscope, kaleidoscope and periscope.

She made a chart about lenses with the help of her group. She likes to do all experiments and activities.

She tried well during the presentation.
She did well in short answer type of questions.

In some topics of light she couldn't understand properly.

❑ English

Brishti has a good handwriting and her spellings are fine but she sometimes makes silly mistakes. She is doing book 7th in grammar. She can understand and do it herself.

She has learnt letter writing. She had to read a storybook and tell the story in class. She was able to but was making silly mistakes. She had to read a paragraph in Hindi and translate it in English. She was able to translate. She has read books-

- Bedtime stories from Panchatantra
- Stories from Rajatara
- Seasons of splendor
- The chronicles of Narnia
- Freedom- Mary Joseph
- The hidden treasures
- Pavel bazhov Malachi's the casket tales from the Urals

❑ Hindi

She is an obedient child and does her work on time. She is focused on her studies. She has finished 7th workbook with question and answers and 8thlevel grammar.

She has learnt many topics this year, like dialogue writing and paragraph writing and proverbs and new words from Basant book, Advertisement and précis writing.

Her Oral expressions are good. She thinks and answers. In library time she likes to read JAPANESE STORIES.

❑ Computer

She likes the computer class. She does painting for 10 minutes and practices typing rest of the time.

She likes to play typing game and she thinks she needs to improve her typing speed even more.
