

Pranav Krisani

Annual Report for 2023-24 (Second Term)

DOB- 9TH JUNE'13

ANNUAL ATTENDANCE 364 DAYS OUT OF 366 DAYS

INTRODUCTION

My name is Pranav Krisani. I enjoy studying at this school very much. I am 11 years old and I study at AMVM. My favourite hobby is playing football and reading comics related to history because I believe it will help me understand about the kings and queens when I read textbooks. I am trying to improve my English by speaking to everyone in English.

SCIENCE

I like studying science because I get good marks in it. Five other children had to retake the test, but I passed. In science, I do many activities and experiments. I enjoy experimenting the most because I learn many things. Sometimes, when I don't understand a chapter, Ambika shows us a science movie and shares interesting facts about science. I am in the 6th grade in science. Prakash Bhaiya teaches us science and my handwriting is very good in this subject. Sometimes, I get bored in class because I feel sleepy. However, I enjoy reading and have completed 6 or 7 chapters. My teachers are Ambika Didi and Jagat Bhaiya. Sometimes, I don't do homework because I feel lazy, but overall, I'm happy to attend science class.

YOGA

Every morning from 6:00 to 6:30, I practice various asanas like the peacock pose and rabbit pose, among others. I usually do yoga properly and sincerely.

Our yoga teacher is Bina Didi, who once had us showcase our abilities on sports day in front of esteemed guests. When I do yoga

postures, I feel relaxed, flexible, energetic, and alert.

SHRAMDAAN

We have five activities for shramdaan early in the morning that we do daily. My favourite shramdaan activity is hostel cleaning because I enjoy sweeping the floor and veranda. I obediently and sincerely participate in shramdaan without any hesitation. I try to be punctual while doing all these activities and am happy to keep our surroundings clean and tidy. I enjoy doing these activities with my friends and also teach them how to do them properly and cheerfully.

GAMES

During the games period, we start with running, then move on to exercises, and finally, we play games. My favourite game is football. I've improved my ability to kick the ball far and my penalty shots are very good. I can dribble past players well and score goals. I've improved a lot in this field.

ODIA

In Odia class, we engage in story writing, dictation, and group reading. Papaji teaches us Odia and currently, we're in the 2nd book. While I can read the words, sometimes I get confused with the punctuations, and then I seek help from Papaji. We've learned many songs in this class and enjoy singing them in the assembly. Sometimes, we watch Odia movies to enhance our listening and speaking skills in our mother tongue.

SOCIAL SCIENCE

In Social Science, I am studying in the 6th grade. We have tests at the end of each chapter. Last year in October, we completed history, and now I am studying geography. I enjoy studying geography because it involves many facts about the earth and early humans. My favourite chapter in history was the Mauryan Period. Bhaiya taught us this chapter, and I enjoyed studying from him. I understood everything in the first chapter as it was easy. I enjoyed doing drawings and watching videos related to the chapter. In the first test on this chapter, I scored thirteen and a half out of twenty, and in the retest, I scored seventeen out of twenty. I took time to understand the concepts of the second

chapter because there were new concepts which I found difficult. I did not perform very well in the test. I need more clarity in this chapter.

HINDI

In Hindi class, we study grammar, story writing, free reading, and group reading. I enjoy reading books in Hindi class. Last time, I wrote a nice poem on Raksha Bandhan. Didi liked my poem very much. My handwriting is good in Hindi. I finished my fifth book, and now I am giving chapter-wise tests. After free reading or group reading, my didis give me dictations, and my spellings are not good. On Christmas, we sang a carol named 'Jhumo Nacho Khushi Se.' When I don't understand difficult words, I ask my didi, and she helps me. On Basant Panchami, we sang a song named 'Saraswati Ma Naman Tumko.' On the Mother's birthday, we recited a poem 'Anokhi Maa.' Didi shows us movies on festivals. I like Hindi class very much. Sometimes, didi scolds me

because I don't listen to her and instead play with my friends.

ENGLISH

In English class, we study grammar, dictation, poem writing, and many other things. My spellings are correct when didi gives me dictation. I like reading books like the Panchatantra, Enid Blyton stories, Jataka tales, adventure stories, etc. I often feel

sleepy during group reading, so I don't enjoy it much, but I like free reading where I can read alone. My handwriting is very good, and I can make small sentences, but I struggle with making big sentences. I can finish my homework very quickly. On Mother's birthday, I wrote a nice story. I watch many movies

like Migration and Avatar: The Last Airbender. I have no stage fear; I can do drama very nicely. Mostly, I speak in English, but sometimes I speak in Hindi. On Christmas, we sang a carol named 'Noel Noel.' I've finished my 4th-grade grammar and now I am doing 5th-grade grammar. In group reading, we read 'Blue Umbrella,' 'Danny and the Champion of the World.' I can't remember the meanings of some words. We've learned many poems like 'Tree,' 'Miracle,' 'Season,' 'Child Imagination.' I am interested in English class.

DANCE

In dance class, we learn many types of dance such as hip hop, classical, Bharatnatyam, Odissi, etc. I like hip hop and western dance the most. Our teachers are Suparna Didi and Brishti Didi. I usually don't like attending the dance class as we are taught classical dance, and I find it tough to catch up with the others. We have this class once a week.

CELEBRATIONS

On 29th November, we sang a song named "It Must Have Been Cold There in My Shadow." In January, we performed a dance. On February 3rd, I went skating. On the Mother's Birthday, we recited a poem. On Saraswati Puja, we sang a song named "Saraswati Maa Naman Tumko."

MUSIC

I am learning tabla. My teacher is Harekrishna Bhaiya, and he teaches us how to play the tabla. I have learned the teen taal and some other variations as well. We have music classes twice a week, and I enjoy them thoroughly. Besides playing tabla, my friends and I like to form a band, and on Holi, we performed in front of everyone. Others enjoyed it very much and swayed to the rhythm.

COMPUTER

In computer class, I use Typing Master. My gross speed is 18 WPM. We also do painting and play games related to Typing Master. Lalu Bhaiya is our computer teacher, and I like the way he teaches us. He shows us how to type, and I always try to improve my speed.

MATHS

In maths, I am studying the 6th-grade book. My favourite chapter is fractions and decimals. I make silly mistakes in math class and have failed many times, but I try my best. Sometimes, I become lazy in class, but I still enjoy math class very much. Sometimes, I get scolded by Bhaiya because I don't listen to him. At one point, I was doing drama, so I couldn't remember anything. I am going to finish my book; there are only three chapters left, and I am determined to finish it.

TRIP TO NORTH-EAST INDIA

I recently embarked on a trip to the Northeast. My journey began with a visit to Paliba, followed by a stop in Koraput. We spent the night in Titlagarh before continuing our travels. Our next destination was Guwahati, where we visited

the Kamakhya Temple. From there, we headed to Rupa, where we enjoyed playing various games, including football.

Next, we travelled to Hawrah, where we had the opportunity to explore the zoo. Our journey then took us to Tawang, where we visited Bumla Pass and the Shivji Temple. Along the way, we were mesmerized by the picturesque streams and waterfalls.

After our time in Tawang, we returned to Rupa, where we were warmly welcomed by the monks who shared fruits with us. Our next stop was Gangtok, where we arrived at 6 o'clock. The local cuisine in Gangtok was delicious, although I only managed to eat twice due to our packed schedule. While in Gangtok, we indulged in some shopping before heading to the train station.

From Gangtok, we travelled back to Howrah, where we visited the Science City and enjoyed various activities such as dark rides and seeing dinosaurs. During our time in Gangtok, we marvelled at the world's largest statue and visited a Buddhist temple. We were also treated to a dance performance by local girls in the evening.

Finally, we boarded a train from Howrah at 10 o'clock and arrived in Koraput at night. From there, we travelled back to our school, AMVM, concluding our memorable journey through the Northeast.
