

Rukmani Mali

Dob- 06-May- 10

Attendance – 179 days out of 183 days

Report for 2024-25 (first term)

Introduction:

My name is Rukmani Mali, and I am 14 years old. I am currently in 10th grade at AMVM. I have a deep love for nature and the beautiful surroundings of my school. My favourite colour is green, and I enjoy drawing natural scenes.

Yoga:

I practise yogasana every morning at 6:00 AM. I enjoy yoga

because it includes many asanas that help make my body flexible. After my yoga session, I feel

relieved and calm. Following yoga, I study Maths in the Ashram until 7:30 AM.

Maths:

I love maths and am currently working to finish my first NIOS book for class 10. I understand most concepts, but I sometimes struggle with word problems. I take tests on the chapters I complete, revising before each test to ensure I am prepared.

Hindi:

I am revising for my exam. One of my favourite chapters is "Bahadur," which I enjoy reading. I sometimes make mistakes with matras while writing, but I love reading Hindi literature.

English:

I have completed both English books and am revising for my exam. In class, we engage in free reading, group reading, and grammar exercises. I enjoy reading books and my handwriting is decent, though I aim to improve it further. Occasionally, I find myself feeling sleepy during free reading sessions.

Science:

- **Biology:**

I have a passion for biology as it teaches us about living organisms and plants. I have finished the NIOS biology book and am currently revising for the exam. I even created a 3D model of a human body, which I found very interesting.

- **Chemistry:**

I also enjoy chemistry, especially the chapters on acids, bases, and salts. I am intrigued by creating new things using chemicals. Although I sometimes struggle with memorization, I am committed to improving. Recently, my group conducted an experiment with ants.

- **Physics:**

I find physics less interesting and sometimes feel bored while studying it. I need to practise more, as I'm not very confident in the subject. I have finished several chapters from the 10th book and am currently revising with Prakash Bhaiya. We are also working through the 10th NCERT book

and watching educational videos to enhance

- our understanding. Recently, we made mechanical projects like robots.

Festival:

Social Science:

I have completed both NIOS books and have taken tests on them. We are currently revising and using other resources for a better understanding, such as the Ratna Sagar ICSE 10th book, particularly in history. I enjoy learning about kings and queens, although I sometimes struggle to remember dates. I also love geography, especially topics related to agriculture, and we are currently studying the

Northeast region.

Art:

In art class, we create many hanging decorations, and I especially love drawing nature. We made pots for Janmashtami and enjoy using watercolours and oil pastels. I always strive to create something new during art class.

Games:

I love playing games! Before each session, I warm up with running and exercises, and I enjoy playing fun games as part of my warm-up. My favourite sports are basketball, volleyball, and football. I particularly enjoy

basketball and volleyball. Sometimes, we have matches with the boys from our school, which helps me improve my skills and gain valuable experience.
