

Rukmani Mali

DOB- 6th May 2010

Rukmani has good concentration in studies. She does all the activities joyfully. She never shirks from helping anybody, even if it is an inconvenience to her. She has interest in studies but is a little diffident. She opens up with a little support from didis. She doesn't always clear her doubts and therefore the concepts are not clear. She is very emotional and gets nervous if somebody speaks in a firm voice. Her languages are good but she needs to improve her writing skills. I am sure she will work hard and improve her confidence. She needs to have better time management and has to start using her spare time to study.

MATHS

Rukmani has just completed her 5th class math book and has started book 6th. She will have to work harder to get a better clarity of her concepts.

SCIENCE

She is very intelligent, but needs to work harder and concentrate a little more for better understanding. With a little more practise, her spellings, grammar and writing speed will improve.

She had selected **skeleton system** for presentation, together with Surendra. They gave a presentation to the Humility group. She was very shy and was not able to present the way she had planned to.

In **water topic** she did an activity on **surface tension**. The group also did a topic on **flowers** where she had chosen to take **rose** and wrote a poem on it and made a drawing with Mother's name for the rose on it. She

had chosen to take **rose** and **gladiolus** in the topic **flowers** and made a beautiful drawing and wrote a poem on both these flowers.

ENGLISH

During group reading, we read Kunnu the cub, Charlie and the Chocolate Factory and George and the marvellous medicine. My reading speed is slow but I love to read in the group. I can understand most of the things while reading. Whenever I sit in the library, I sit with small storybooks and read loudly so that didi can hear me and help me with my pronunciation. I like to do creative writing. I can think well and am able to write but my spellings are very poor. In writing question answers, sometimes I need help of didi. In English class I speak in English.

HINDI

She understands the basic stories and does question answers from it. In opposite words, making adjectives, making sentences with given words and meaning of phrases, she faces difficulty and needs explanation. She has completed 5th class Bhasha drishti book and its exercises. She can work a little harder with writing. She is doing 4th class book of grammar. Now she has started 6th class textbook Basant- bhag1.

Odiya

Rukmani's performance in Odiya is normal. She is working towards improving her knowledge.

My Sports Day- 2020

My sports day was very good and I did my best in physical demonstration. My corner's name was circus. I learnt how to skip. I also learnt hoopla. I faced difficulties in jumping and doing hoopla on the plank. While performing I enjoyed a lot. I improved my physical stamina, strength and balance.

PROJECTS

- With Ruth Didi, I drew the map of Australia.
- Didi taught me a native Australian song and I took Didi to the village. Next day I played language games.

GAMES

She likes playing basketball, football, base kickball and dodge ball. In basketball she practises shooting, throwing, passing, lay-ups and some drills. She enjoys playing basketball. In the game, she sometimes gets the ball, but immediately passes it to some other child. She needs practise to score baskets, giving long passes and to receive the ball. In dodge ball she gets out very quickly. She has to practise

for agility. She also plays football but needs to run more, as she only runs when prodded. We encourage her and make her practise with the ball. She is a cheerful girl on the field. She does all the exercises and running if somebody makes her do it.

COMPUTER

Rukmani often asks for help if she gets confused. She likes to draw and uses a variety of tools in Paint. She likes to play typing games. She does her story typing in MS word.

ART

She is regular in the art class. She has a lot of interest in doing art. She is quiet during the class and concentrates on what she is making. She is a bit slow in doing some crafts like paper folding and stencil cutting.

Social Studies

Rukmini is very interested in the subject. Her understanding is quite good but she finds difficulties in answering questions in her own words. She joyfully helps in chart making and other activities. She also shares her ideas. She loved reading about Mediaeval India. She did a topic on Ghoris and collected information about him and told in the class. She was a little shy but took her time and shared her points.

ANDAMAN TRIP

My school trip was to Andaman Islands. It was an enjoyable trip because we sat in the ship for the first time and saw Flying fish, tortoise and dolphin, etc. We stayed in the Port Blair. We went to the park, beach, museums, Cellular jail etc. We spent one evening there for the light and sound show. I was very sad because the British did not giving our freedom fighters nice food and clothes and would beat them when they could not work properly. We ate fish everyday, which I liked very much. I liked Radha nagar beach the most because we swam there and saw Zebra fishes. I didn't like Chidiya Tapu because there were less birds and animals and we walked for a long time. But I liked this trip very much and want to go again.
