

TULIKA KRISANI

I am 13 years old and my date of birth is 27th December 2006. I like to do all the activities and I enjoy whatever I do. I am not disciplined and my attitude is not good. I like to play football and at times I get angry and I scold whoever comes near me. I like to study maths because I find it easy. The other subject I study are Science, Hindi, English, Social Science and Computer Science.

Science:-

In Science I have completed 9th book. But i cannot concentrate for a long time, and i cannot understand all the concepts properly. i Have a problem memorising quickly in physics and chemistry. I like Biology. In Biology i like cells chapter.

Maths:-

In maths I have completed some chapters like profit and loss, integers etc. And when i cannot understand or can't do, then I ask didi. And I concentrate in maths and do it neatly. In maths i like geometry most.

English:

In English I have covered the course. My handwriting is not good. My grammar is also not good and I can't read fast. I stop in the middle. While writing I make spelling mistakes. I have started to improve my reading and writing.

chapters properly. I like to study about the history of the Great Mughals. But I cannot memorise very

Hindi:

In Hindi I have completed the 9th class book. My handwriting is very good and in Hindi. But I cannot understand and I can't read properly. I need to improve more in my reading of Hindi. I face problems with my grammar.

Social science:

In social science I cannot write fast when didi dictates the points. And I cannot understand and I can't memorise the

fast like other children. I cannot understand the basics of Geography. But i like the chapters in History because they are easy.

Yoga:

In the morning I wake up at 6:00 am and straight go for yogasana. I don't have the flexibility to do all the asanas. I like to do Suryanamaskar because by praying to the Sun God, He may free us from diseases. I like yoga because it helps us to be more fit and flexible.

Food:

I never waste or throw food and I always eat everything. When there is less salt in the food, I don't like it.

Games:

I play Football, Basketball and Volleyball during sports time. I am the goalkeeper when we play Football. In Basketball, I like to

run and score baskets. I like to play basketball because I get to run.

Festivals:

During celebrations of festivals I like to do drama and dances. On The Mothers birthday, I played keyboard and sometimes we sing also. I have performed during many festivals in the school but sometimes I don't take part in the plays on some occasions.

Shramdan:

In Shramdan I do cleaning, kitchen, gardening, toilet cleaning, etc. And I do it very nicely whatever it is.

DANCE:

In December we learnt Western Folk Dance with Nirankar bhaiya. It was nice and I caught the steps of the dance very easily.

Computer:

In computer class I do typing or I play typing games. And sometimes I do painting and I enjoy that. I also type stories when told by our teacher.

Andaman Trip

I started my journey on 6th March at 12:30 pm from Kechla in a van for Paliba station. I was in the train for north Simhachalam at 4:10 pm. I stayed the night and went to the Simhachalam temple early the next morning. I came back from the temple and picked up my bag and took a bus to the port. I sat in the ship for 3 days and I saw many thing from the ship like fishes, etc. In the ship I saw how the radar works. We know when there is a ship in front, even in the dark. I saw antenna at the top of the ship. The function of antenna is to detect if any flight or ship is coming. There are two lights in the ship- red and green. We reached Port Blair on 10th evening.

In the morning we went to

CELLULAR JAIL

First I went to cellular jail it had seven wings. Four had broken by an earthquake. A tower was there in the middle of those seven wings. This jail was built by the prisoners under British supervision. The British used to torture the prisoners and gave them work. If they were not able to complete the given work, they were given punishment like taking out oil from coconuts. And sometimes they were given death sentence. And they would keep one prisoner in one room and they couldn't meet each other. The British did not even give them proper food.

We also saw the sound and light show in the evening at the jail.

MARINE MUSEUM

In Marine museum we saw many colourful fishes, shells, corals and the

reptiles of the sea. There were different types of fishes like flying fish, octopus egg, sea snake and cat fish. I liked the museum.

SCIENCE MUSEUM

In Science Museum I saw many models and I enjoyed seeing them. After that we saw the 3D show. In this they showed how the tortoise lived their own life. And the work they did.

BARATANG

I went to Baratang saw the limestone cave. It was very beautiful and people say that the cave was inside the sea and when the sea dried, the cave came out. And the cave was shining because there was mica and silica in the rocks. In the stones there were many natural figures of human head, elephant and Ganesh, etc. I saw many jarawas in the way.

HAVELOCK

I went to Havelock and i enjoyed playing in the sea water. I was looking for shells. The next day I went to suicide point. I saw the sunrise and we spent some time there throwing stone in the water. We were throwing it with all our strength but it

would not go far. After that I went to North Bay by speedboat. When there, I saw many fishes and corals. It was so nice to be there. After that I went to the seashore and there we all had a swim. I tasted the salty water in the sea. After that we went back to the hostel.

ZONAL ANTHROPOLOGICAL MUSEUM:

In Zonal anthropological museum I learnt many things about the tribal people. They are very different from us. They hunt animals and are naked. And they have a different culture. There are six groups of tribals

- ✚ Onge
- ✚ Sentinelese
- ✚ Nicobarese
- ✚ Great Andamanese
- ✚ Jarava
- ✚ Shompen

Onge were not developed. They have their culture now also and it's the same. Sentinelese are also not developed and they are very shy of the Modern people like us. They live near the stream or a river. If they see humans like us, then they kill them.

Nicobarese are developed and they are like us and they are Modern. And their houses are 7 metres above the ground. Great Andamanese are now developing by integrating with the people and they are doing like us and are changed.

NATURE PARK:

In Nature Park we saw many things like how the butterflies take birth from an egg. There was a stream and there were lots of flowers. It was good.

GOVERNMENT SAW MILL AT CHATHAM:

We saw that many types of wood. I came to know that on December 27 (my birthday) there was bomb dropped there and everything was destroyed. Everything was made up of wood and it was very beautiful.

GANDHI PARK:

In Gandhi Park there is a garden and it is beautiful. There is a statue of Mahatma Gandhi. We played on the slide, swing and see-saw.

We then picked up our luggage and came back to the ship. We were there for four days and then reached Kolkata. I stayed there for one night and returned by train to Kechla.
