

SWATI JANI

MATHEMATICS:

I am doing the Class 10 syllabus of NIOS. I have completed the syllabus and now I am preparing for the exams. I find Mathematics very interesting. Generally, I love the subject but when I cannot solve the sums, then I lose interest. I enjoy solving questions, especially word problems. Sometimes I also find the subject difficult. There are two parts and in the first part I have finished:

- Number system
- Exponents and Radicals
- Algebraic Expressions and Polynomials
- Special Product and Factorization
- Linear Equations
- Congruence of Triangles
- Concurrent Lines
- Quadrilaterals
- Similarity of Triangles
- Circles
- Angles in a Circle and Cyclic Quadrilaterals
- Secant Tangents and their Properties
- Construction
- Co-ordinate Geometry, etc.

SOCIAL SCIENCE:

I am in class 10th. I have finished the textbook and am now preparing for my exams. In Social Science, there are two books. Book 1 contains History and Geography and Book 2 contains Political Science. My favourite subject is

Geography because it is based on the environment and I find I can relate to it. This makes revision easier.

HINDI:

Hindi is a very interesting subject, but there are some words that I find difficult. I like Hindi lessons very much. I have finished the Hindi textbook and now I am preparing for my exams.

I don't like grammar because I find it very difficult and complicated. I like to read Hindi story books and do the questions and answers. I like to make stories from my imagination. But I don't get the time to indulge myself as I have to prepare for exams.

ENGLISH:

I have already finished the textbook and am now preparing for my exam. I like to read books with my English teacher. I do questions from the English book. I find both the questions and grammar easy. English grammar is easier than Hindi.

GAMES:

I like to play all types of games like football, volleyball, basketball, kickball etc. I like football and volleyball the best. In football, I am good at defence but sometime, I feel lazy or weak and do not like to play.

FUNCTIONS:

On December 25th we celebrated Christmas. We sang two carols; one in Telegu and the other one in Hindi. We celebrated in the School in front of the library. On January 8, I participated in the Sports Day. On March 10, we celebrated Holi. On Holi, the teachers celebrated by holding a fete and put up food stalls for us. The stalls were of: watermelon, Pani puri, Burgers, Chaat and Lassi. We all really enjoyed it.

SPORTS DAY:

There were games like flying disc, tug of war, racing, etc. The children also participated in many events like Yoga, Pyramids, Gymnastics, Unicycle and Skating. Pranjal bhaiya, Bhuvan, Talsa didi and Chandarma didi performed a skit on two jokes. I only participated only in yogasana.

TRIP TO ANDAMAN:

We started the trip to Andamans on February 20. We reached Vishakhapatnam at night. In the morning, we went to the Simhachalam temple and we had to climb 1100 steps to reach it. In the evening, we boarded the ship. It was a 3-day voyage to Port Blair and we reached on February 24.

Next day we went see the Cellular Jail. We saw the cells where the Indian freedom fighters were kept and the guide told us how they were treated by the British. If the prisoners did not heed them, a very severe punishment was meted out to them like being drowned in water, hanged, lashed, starved for many days, etc. In the evening we again came to the Cellular Jail to see the Light and Sound Show. It was very

nice but the one we saw in Delhi two years back was better.

Next day, we went to the Fish Museum and we saw many fishes, coral and shells. In the evening, we went to the beach. We went to see the Tribal Museum next day. We saw pictures of different tribes, read about them and came to know how they lived, what type of food they used to eat. And in afternoon, we went to the Flag Point. We learnt about Subhash Chandra Bose there.

Next day we went to Chidiyatapu and saw different types of animals and birds.

In the afternoon we went to a different beach where we were not allowed to go inside because there was a

crocodile there. We also saw the Gandhi Park and did boating there, besides playing in the playground made for children. Later, we visited the Marina Park. It was my cousin's birthday that day so, we celebrated it there.

Next, we went to Radha Nagar beach and all of us went for a swim. It was really very enjoyable. In the evening again, we went to the Port Blair beach but we were not allowed to go inside the sea. We stayed there for only fifteen minutes.

We went to Ross Island, but only for 10 minutes and then we took the same ferry to North Bay Island.

We had a thrilling experience of going in a glass-bottomed boat and we could see corals, and many types of fish at the bottom. At the island, all children relaxed under a tree while all the teachers went for snorkelling.

The next day was our last day, and it was time for the return journey. After we reached Vishakhapatnam, we went to the railway station and found out that the train was running very late. So, we had some free time and we went to see the Submarine Museum and the Aeroplane Museum. We saw the planes that have been used since the olden days. We also went to the beach. Then we took the train and reached Koraput station and then back to Kechla.
