
Radha Muduli

April-2018 to March-2019

Date of Birth- 14th December 2004

❑ Hindi

In the last 6 months from October 2018 to March 2019 I have covered

- Syntax
- Correction of incorrect sentence
- Phases
- Voice
- Punctuations
- Decorations

- Idioms and proverbs
- Letter writing
- Essay writing
- Oral expression
- Prefix and suffix
- Joining
- Compound
- Simple complex

❑ Hindi

I enjoy the Hindi class very much, but sometimes it is boring. I enjoyed writing essay about the Indian society. I learnt how to write and enjoyed doing it but I like to write creative essays and I like my own creation.

One of my favourite subjects is Hindi but my writing is very slow. I like to study Hindi with my classmates and we had learnt a song for Christmas. The song is sung by Arijit Singh. The song is *Neki Ki Raahon Pe Tu Chal*. I learnt the song very quickly and love to sing it. It is one of my favourite songs.

Hindi

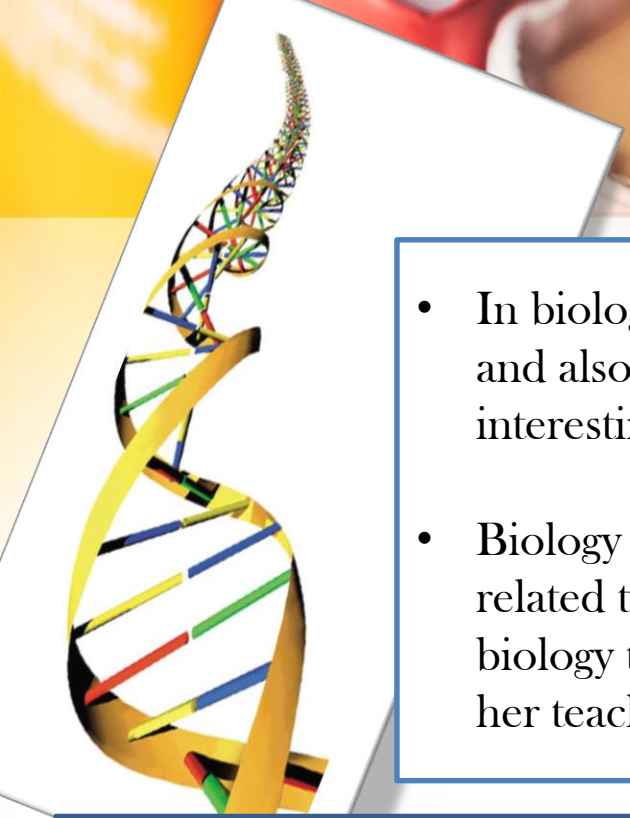
I had some problems in oral expressions and I am very shy to speak, but I think my understanding is good. I also understand very quickly. I revised from my notebook for my test. I mostly got good marks, but sometimes I did not do too well. But I like to attempt tests. My biggest problem is that I have mood swings most of the time.

Also, I would get angry on Didi if she would scold me and I would think why Didi is only scolding me. After many days I understood my mistakes and now I really like Hindi class very much. One day Didi gave us an essay to write about our society and I wrote 3 pages and got 8 out of 10. I think I did my best in these 6 months and also tried my best.

❑ Science

- I do my science class at 8:30 am in the morning. In science I study biology, physics and chemistry.
- I enjoy science but in physics I face problems in solving numerical.
- Physics is a boring subject for me but I try my best to do and try to work hard on the physics chapters.

❑ Biology



- In biology I have covered all the chapters and also revised them 2-3 times. It is an interesting subject.
- Biology is easy to remember because it is related to our body and nature. I love my biology teacher because she is kind and her teaching style is good.

In biology I have covered all the chapters and also made notes on all chapters. Now I know half of the biology course very nicely. I have covered both the 10th class books. Now I have to only revise from the point of view of my exams.

❑ Chemistry

I enjoy Chemistry class because in chemistry we have lots of experiments and it is interesting.

One of my favourite subjects is science and I am trying to work hard because I want to really get good marks in my exams.

Math

I finished my 8th class math book in December 2018 and I didn't do 9th book. So I am trying to work hard, but most of the time I don't work hard and waste my time.

In January 2019 I started 10th class book and have covered 6 chapters. I think I am really working very slowly.

But when bhaiya teaches us I put all my attention for learning it quickly. 10th class book is not too difficult. I have no problem in solving the equations but I face some problems in solving word problems.

I am poor in geometry and I take a lot of time to solve it and I face difficulty in proving them.

❑ Geography

In the last 6 months I have covered almost all the chapters in geography and now I am studying with Bikanti Didi.

I don't enjoy geography class much because most of the time I waste and am not serious. Sometimes it's very interesting and funny.

I don't do well in geography tests and I can't remember all the things. I don't know why I can't memorise even after reading nicely.

There are a lot of things to study in geography. Although geography is related to agriculture and seasons. Everything is happening where I stay but still I don't memorise it.

❑ History

I do history class with Gauri Didi and she is teaching us very nicely and her teaching style is very good. I have covered 5 chapters in these 6 months.

I like her and sometimes I do the tests very nicely and sometimes I don't pay any attention and do the tests very badly. But she never scolds me and she is very kind hearted.

My history class is going on very nicely and I am enjoying it very much. It was one of my boring subjects but now it is not a boring subject.

❑ English

I have finished both the books of NIOS and the stories in it were very interesting and very good. Also, the poems were very nicely written.

I feel English is a very easy subject and not too difficult. The class is very enjoyable.

I covered the whole book with Pranjal bhaiya and it was really very good. His teaching style is good and he also tells us very interesting things. He is not strict and is very funny.

❑ Sports

In Sports I play all the games like

- Football
- Basketball
- Volleyball
- Minor games

In the last 6 months I have improved a lot. My favourite game is basketball and then football. I don't like to play volleyball because it's a boring game for me. In football the children make me goalkeeper but most of the time I play in front and I enjoy the game.

It is a very good game and I enjoy a lot. I like to play basketball and I like to shoot and I get very happy if I do 3 pointers and I enjoy a fast game. If my team is continuously scoring, then also I feel happy, but I don't like to play when the children fight.

❑ Shramdan

I regularly go for my Shramdan. In Shramdan we do

- Kitchen
- Gardening
- Music class
- Toilet cleaning
- Lalu's army

On Sundays we do room cleaning and last few days I used to go to study maths in the morning. I like to do all my Shramdans.

Sometimes I get late but when 2 minutes are still left, then I go for breakfast. On Kitchen duty day I stay for a long time.

AT 6:00 am we go for yogasana and do it for 45 minutes. I lead the class and I also do the asanas and my body is slowly getting flexible.

❑ Trip To Rajasthan

I liked the trip to Rajasthan. We went to almost the whole of Rajasthan. I don't remember the names of places where we went. I liked the Gulabpura hotel where we stayed.

The hotel was very clean and the place was also very clean. But outside the place there was a lot of pollution and it was dirty because it is a industrial town.

Saheli ka baag in Udaipur was very interesting and we took very nice photos and the fountains were very nice. We went to Pushkar Lake and it was really very nice. We went to very nice places and wherever we went, we would tell bhaiya to get us ice cream.

We did camel riding and it was really very interesting but I was very scared and I was shouting, but after sometime I was fine and didn't shout and I was feeling that the camel was making us dance and when the camel was sitting down then I was feeling like I was about to fall.

Then we played a lot on the sand dunes and even Pranjal bhaiya was playing with us. After riding camel, we went to see night performance and in that I liked the man who was taking out fire from his mouth and he told that if somebody wanted to learn, then he would teach them for free.

I wanted to learn because it was the most amazing thing I had ever seen in my life. This was a very good and amazing trip.
