Social Science

In Social Science, I am doing the syllabus of Class 10. Currently, we have almost finished the Geography part. We have started studying Political Science and we have only four chapters to cover. In History, we have done only 2 chapters. I am able to understand whatever didi teaches me and I am also able to attempt

the questions and answers on my own. I get them checked from didi after finishing them. Since I understand the subject, I score well in all the tests that are given to us. Sudeep bhaiya had come from Assam to Kechla and took our Geography and History classes. My teachers tell me that I

need to improve my handwriting.

Mathematics

I am doing the 1st book of Class 10. I have completed 6 chapters.

Whenever I do not understand any concept, I go to didi for help. I am weak in calculations, so I need to

practise a lot so that I don't make mistakes. Sometimes I get distracted by seeing other children. Though I am a little weak in this subject, but I always try my best to be good at it.

English

I am presently doing the second textbook of Class 10 syllabus of National

Institute of Open Schooling (NIOS). I have finished the first book and now I am giving the tests of all the chapters. I score well in these tests. In the second book, we are on Chapter 4. We also do free reading, group reading, creative writing and take dictation in English. In grammar, I have done letter writing, notice writing, message writing and paragraph writing. I have also done active-passive voice and direct-indirect speech. I have a lot to learn in

English if I want to do better.

Science

In Science, we are presently doing Physics. I have completed the syllabus of Chemistry. I have to give the test on Carbon and its Compounds. We have also started doing Biology. Meeta didi from Lucknow had come to teach us Biology. Meeta di also gave us a

test on Nutrition and I scored very well in this. Raghu bhaiya taught us many Science practicals and I enjoyed them a lot. In Science, I like Biology the most.

Hindi

I have finished the first book and now I am revising for the tests. I have

given the test of each and every chapter that we have covered so far. Hindi is an interesting subject but I don't like it much. Krishna didi from Gurgaon came and taught me grammar. In grammar, I have done letter writing, essay writing, compound sentence making and many other things. Poonam didi taught us

spoken Hindi.
