

Kapil Jani

Date of Birth – July 31, 2010

Report for 2022-23 (first term)

Social Science

I am following the book of Class 7. We have completed the History portion of the book and have almost finished the syllabus of Geography and Civics too. Only 3 more chapters are left in Geography. In Civics there are 7 chapters. On Sundays, we read Amar Chitra Katha and sometimes watch movies related to our syllabus and some movies of historical importance. In the tests that I have taken so far, I have not been able to perform well, so I am trying to work harder and improve my scores. I have just completed the chapter on Transport and Communication and when I saw short videos of cargo ships and Indian railways carrying goods, it helped me to understand easily and quickly. I really enjoyed the shows and we also saw how satellites are launched and how information is sent and received.

In Civics, I have started doing the chapter on State government. We have just discussed Odisha Government and its districts.

English

Besides free reading and group reading, we also do grammar and recitation in the English class. Recitation and group reading is mostly done on

Sundays. I can read and understand English quite well. In the dictation, I usually score well but if there are wrong spellings, then didi asks me to do the corrections. In grammar, I have almost finished the book of Class 5. When I go for free reading to the library, we are instructed to replace the books back in their proper places. I get some books issued from the library to read in my free time. I am able to read them properly with proper pronunciation. I like reading funny stories like Coconut Water and others. When we do group reading, we use Kindles. We are presently doing the New Broadway of Class 5 and we are on Chapter 4. After each chapter we take a test.

Odia

In the Odia class we do reading, dictation, singing and dramas. I have learned reading and if I get stuck somewhere, I ask my teachers.

Hindi

I am following Vasant Bhag-1 of Class 6. My handwriting is not good, so I have to do a lot of practise to improve it. In grammar, I have finished Book 5 and moved on to Book 6. When I give tests, my results are very mixed, so I need to work hard. When I go for free reading to the library, I read Panchatantra stories and these stories always have morals that teach us about everyday lives. On fifth of July, I participated in a drama named "God". I liked the drama because everyone performed very well. The play was about student life. I played the role of a Vidwaan but unfortunately I could not do justice to the role.

Science

In class, we are doing the book of Class 6 with Jagat bhaiya and Ambika didi. So far, we have done the chapters on Acids, Bases and Salts, Electricity, Force and Light and Motion. In the chapter

on Acids, Bases and Salts, we have done a few experiments and I learnt many new concepts from these experiments. In the experiments done for the chapter on Electricity, we learnt how to make a generator and electric current. I face some problems in solving the numericals.

Mathematics

I am following the course of Class 7 and have finished 9 chapters. The 10th chapter was somewhat difficult and I had to take a lot of help from Bikanti didi who is our teacher. I get good marks in the chapter wise tests given to us. When we finish the whole book, we will be given a test based on the entire book.

Computers

In computer class we learn typing like asdfjkl. I study with Lulu Bhaiya and I like this class. We are also doing typing master.

Trip to Leduguda

I went home on August 1 and we were taking cows for grazing and loved eating guavas directly from the trees. I really enjoyed my vacation. I played marbles with my friends and watched movies. I returned back to school on August 22. After I came back, I was studying with Pranjal Bhaiya. I am not staying in the hostel now and have become a day scholar. When I was at home, I was helping to dig out the nuts and edible roots and we also caught some fish from the reservoir.

Games

I like to play football and am good at defending. I don't play forward because I get scared by the rough play of other players. Although we play many games like basketball, volleyball and football, but my favourite is football. I am not able to play games now because I am not staying in the hostel anymore. I have an option of playing even now provided I am regular, punctual and do the warm up exercises in the proper manner.

Dance

We are learning many different forms of dances and although I enjoy the dance classes but I am not very good at it. Suparna Didi teaches us. Denis Bhaiya had come from Delhi and he too taught us dance. I liked what he taught us and I was able to follow all the steps.

Music

In the Music class, I learn singing from Anuradha Didi. We use the harmonium to play songs and practise sargams. Sometimes we also practise in the evening for school programmes.

Shramdan

In Shramdan, we do work in the kitchen, toilet cleaning, hostel cleaning, gardening and school cleaning. I like to work in the kitchen because I like to cut the vegetables. While gardening, we dig the ground and water the plants. In school cleaning, we work in the groups.
