

Mahadev takes initiative, is always ready to learn new things. He waits for new topics to be taken up in Math and Project class. So he tries to finish the current topic related exercises as early as possible.

At times he is confident but pretends to be confused. He likes competitive work and always wants to do the best. When he does not get the score best points he gets upset.

He takes lot of interest in physical activities.

Mahadev is not greedy or materialistic. He makes do with bare minimum things.

But he needs to learn to arrange his things properly and keep them neat and clean.

He is hard-working.

He never asks for clothes, shoes or toys but asks for a good notebook.

When he gets that his happiness is immeasurable. He writes in good handwriting.

He draws well. On 14th Nov. he sketched a portrait of Nehruji and on Mother's birthday he made a picture of The Mother.

But he loses interest and leaves his drawing half done when he finds it little difficult.

Mahadev is interested in almost all the subjects. He is regular to the school.

He says that he likes the review tests taken on completion of a topic. "Through the test we can check ourselves, how much we have learnt". So he is always ready for tests.

He is good at reading and has good comprehension skills.

These lines below are Mahadev's thought ...

I like to do math, science and computers and many other things. I am happy to be a human being and nothing else because we can learn many things.

In this year I have developed in computers, science and math. I need to be a good human and I will read as much as I can.

ODIA LANGUAGE - Mahadev wants individual attention of teachers every time. On the other hand his effort in reading, writing and participation in activities is lacking. Due to this attitude he is not improving as required. His reading skill is average. Knowingly he does not write well.

ENGLISH LANGUAGE - Mahadev knows his spellings but many a times goes wrong because he is unable to differentiate the sounds.

He does his grammar work decently well and is able to produce interesting stories.

His pronunciation too is slightly confused but during the drama, he learnt the utterances of many words and did not get them wrong which was crucial as he played the narrator.

His handwriting needs more work. Is able to read and largely comprehend what he is reading. He can learn it much faster if he gives in more concentration at all times. His writing is very interesting when he wants but he is slightly inconsistent.

MATH - Mahadev has just finished the level V book. He is a hard working and sincere about doing math.

He is clear about H.C.F, L.C.M., measurements and circle, 4 basic operations, volume and area.

He took long to understand the time concept but is now confident about time, fractions, decimals, and money. His understanding in word problems is still low. He likes to play monopoly and chess.

HINDI LANGUAGE - Mahadev is quick and reads well. He is very good in taking dictation, he scores well. He can write on every topic. He also writes stories. He is quick to pick up grammar concepts. He also retains and responds when asked questions.

SANSKRIT LANGUAGE - He reads well. He is quick to understand, makes sentences well. Whenever he does not understand he asks. When asked to translate, he does well. He picks up new words also quickly.

PROJECTS - Extremely sincere and bright. Test, quizzes, competition is his drive. When in a bad mood his work tends to get sloppy.

While doing the mountains and oceans topic Mahadev faced some problem in understanding the geographical and scientific concepts.

PROJECTS - For mountains, only reading and explanations did not work, he understood using objects and models. He took interest in identifying different types of hills and mountains near school.

To understand about oceans he saw a number of pictures of earth and the evaporation of molten lava, to understand the concept and reproduce it clearly.

In the deserts topic first we learnt about the geography of earth such as poles, hemispheres, climate zones, tropics and the equator.

Mahadev has good comprehension skills.

Whenever he reads a social science or science related book, later when given questions, he answers correctly.

He is curious, inquisitive, he made a thorough list of questions about deserts, subsequently found answers referring to various books in the library.

Whenever he does not understand anything, he makes it a point to clarify.

GAMES AND SPORTS - Mahadev is very good in Basketball, dribbling and running around well, with a good shooting prowess. However, he tends to play a little solo, forgetting it's a team game and gets moody when he doesn't get the ball.

He has good potential in Football, as a defender or a striker and is also quick. Little more attention there and can be much better.

He is learning Volleyball well. He gives a clean lift over the net.

On Sport's Day he participated in Acrobatics, Football, Circus and Skating.

In Acrobatics he showcased very good hand stands.
